Structured report is a reality with ESTENSA

ESTENSA is innovating the way radiologists and cardiologists produce and distribute reports.

The structured reporting functionality is combining quickness with efficiency, allowing to share key images, observations and associated measurements with specialists and clinicians.

Estensa **Structured Report**

Change thinking reporting

- Radiologists can increase the content of reports with key images, findings and quantitative data
- Standardize radiological outcomes
- Keep processing results recorded
- Keep trace of each finding
- Import measurements automatically
- Create customizable structured data specific for each modality
- Use free text and/or customizable coding and classification system
- Use configurable publishing functions with key objects and presentation states
- Get quick access to patient folder
- Use combos, pre-defined fields and pre-defined templates
