

## Press Release

December 13, 2016

### **Esaote presents MyLab™One at Arab Health 2017: Portable Ultrasound with a Touch**

13 December 2016 [GENOA, ITALY] – **Esaote**, which is one of the world leaders in the manufacture of diagnostic ultrasound systems and probes and has been on the market for more than 30 years, **developed the MyLab™One - Portable Ultrasound with a Touch** thinking about the user giving special attention to ergonomics and ease of use.

Advanced technology is embedded in a robust and versatile system for use across a broad range of diagnostics applications such as **Emergency Medicine, Regional Anaesthesia, Physiotherapy, Vascular Access, and Critical Care.**

A dedicated set of tools was created to help the user during the daily routine from knobs on probes, full touch screen technology, to onboard application libraries. Due to its flat front panel the MyLab™One can be easily cleaned, allowing also the use of a dedicated cover for sterile environments.

A long-life battery in conjunction with a multi-probe connector and wireless connectivity creates an optimal workflow leading to the improvement of the patient throughput. The system can be used in a roll stand, docking station, attached to an articulated arm, or simply carrying it in your arm.

Esaote dedication to the ultrasound point of care market is driven by our commitment to provide the most effective solutions at an affordable cost.

Esaote will be exhibiting **MyLab™One at Arab Health 2017**. For more information please visit our online resources at [www.esaote.com](http://www.esaote.com)
