**DICOM Conformance Statement**

**Document Version 7.3**

**Date: DEC. 7, 2016**

## 1 CONFORMANCE STATEMENT OVERVIEW

MyLab is a family of Ultrasound scanners made by Esaote; their software is based upon the Windows® Embedded Standard 2009 (WES 2009) Operating System. This DICOM® Conformance Statement (DCS) specifies the conformance to the DICOM standard<sup>1</sup> for the Esaote MyLab systems.

The MyLab systems implement the necessary DICOM services to download work lists from an information system, to save acquired Ultrasound images, clips and Structured Report objects<sup>2</sup> to a network storage device, to save them on a CD-R, DVD, USB and Flash Memory, or to print images to a networked hardcopy device. It is also possible to retrieve and display Ultrasound, Ultrasound Multiframe and Secondary Capture objects from media and from a Query/Retrieve server.

Parts of this document are taken from the templates present in the DICOM standard document PS 3.2,  
© Copyright by the National Electrical Manufacturers Association.

Table 1 provides an overview of the network services supported by the MyLab systems.

**Table 1  
NETWORK SERVICES**

SOP Classes	User of Service (SCU)	Provider of Service (SCP)
<b>Transfer</b>		
Ultrasound Image Storage	Yes (*)	Yes (*)(***)
Ultrasound Multiframe Image Storage	Yes (*)	Yes (*)(***)
Secondary Capture Image Storage	Yes (*)	Yes (*)(***)
Comprehensive SR Storage	Yes (*) (**)	No
<b>Query/Retrieve</b>		
Study Root Information Model FIND	Yes (*)	No
Study Root Information Model MOVE	Yes (*)	No
<b>Workflow Management</b>		
Modality Worklist	Yes (*)	No
Storage Commitment Push Model	Yes (*) (**)	No
Modality Performed Procedure Step	Yes (*) (**)	No
<b>Print Management</b>		
Basic Grayscale Print Management	Yes (*)	No
Basic Color Print Management	Yes (*)	No

(\*) Enabled by the purchasable DICOM option.

(\*\*) Not present in VET models.

(\*\*\*) Ultrasound, Ultrasound-Multiframe and Secondary Capture images only.

### 3 INTRODUCTION

#### 3.1 REVISION HISTORY

**Table 3  
REVISION HISTORY**

Document Version	Date of Issue	Author	Description	Systems	SW build
7.3	Dec. 7 <sup>th</sup> , 2016.	Luigi Pampana-Biancheri	<ul style="list-style-type: none"> <li>- New models.</li> <li>- New sw releases.</li> <li>- Query/Retrieve and FSR.</li> <li>- Echo-cardio and Vascular DSR tables completely rewritten due to the improved mapping of the Esaote measures.</li> <li>- Added Fetal Custom Section.</li> <li>- Capability to reduce the matrix of the exported clips.</li> <li>- Small changes in Store and Worklist.</li> <li>- New private attributes for CnTI clips.</li> <li>- Various small changes.</li> </ul>	MyLabSix MyLabSeven MyLabAlpha MyLabGamma MyLabDelta	F060XXX F065XXX

This document applies to all the software releases identified by the SW builds listed in the above table, for the MyLab systems indicated (please note that every "X" in the SW build column stay for a number); when not indicated, all the sw releases having the same build number share the same DICOM behaviour. Always check for the latest version of this document covering the desired system and software build. Foot page notes will appear indicating the differences among the various systems, if any. Some of the MyLab systems are intended for veterinary usage: these models are identified by the "VET" suffix; the differences between human and veterinary systems are explicitly described in this document. For systems with suffixes not indicated in the table above, please refer to the same model without any suffix.

For any other information, or for the latest version of this document, please contact Esaote:

### 3.2 AUDIENCE

This document is written for the people that need to understand how the MyLab systems will integrate into their healthcare facility. This includes both those responsible for overall imaging network policy and architecture, as well as integrators who need to have a detailed understanding of the DICOM features of the MyLab systems. This document contains some basic DICOM definitions so that any reader may understand how the MyLab systems implement DICOM features. However, integrators are expected to fully understand all the DICOM terminology, how the tables in this document relate to the product's functionality, and how that functionality integrates with other devices that support compatible DICOM features.

### 3.3 REMARKS

The scope of this DICOM Conformance Statement is to facilitate integration between the MyLab systems and other DICOM products. The Conformance Statement should be read and understood in conjunction with the DICOM Standard. DICOM by itself does not guarantee interoperability. The Conformance Statement does, however, facilitate a first-level comparison for interoperability between different applications supporting compatible DICOM functionality.

This Conformance Statement is not supposed to replace validation with other DICOM equipment to ensure proper exchange of intended information. In fact, the user should be aware of the following important issues:

- The comparison of different Conformance Statements is just the first step towards assessing interconnectivity and interoperability between the Esaote product and other DICOM conformant equipment.
- Test procedures should be defined and executed to validate the required level of interoperability with specific compatible DICOM equipment, as established by the healthcare facility.
- Some of the MyLab systems have participated in an industry-wide testing program sponsored by Integrating the Healthcare Enterprise (IHE). The IHE Integration Statement for these MyLab systems, together with the IHE Technical Framework, may facilitate the process of validation testing. See <http://www.esaote.com/dicom.htm> for the list of the systems that participated to IHE.
- The DICOM standard will evolve to meet the users' future requirements. Esaote is actively involved in developing the standard further and therefore reserves the right to make changes to its products or to discontinue their delivery.

The DICOM functionalities given by the Esaote MyLab systems are implemented by means of the DCMLab Library, a DICOM software library which has been developed by the Esaote DICOM Management Group (EDMG), in order to offer to all the Esaote modalities and applications a common DICOM platform.

### 3.4 TERMS AND DEFINITIONS

Informal definitions are provided for the following terms used in this Conformance Statement. The DICOM Standard is the authoritative source for formal definitions of these terms.

**Abstract Syntax** – the information agreed to be exchanged between applications, generally equivalent to a Service/Object Pair (SOP) Class. Examples : Verification SOP Class, Modality Worklist Information Model Find SOP Class, Computed Radiography Image Storage SOP Class.

**Application Entity (AE)** – an end point of a DICOM information exchange, including the DICOM network or media interface software; i.e., the software that sends or receives DICOM information objects or messages. A single device may have multiple Application Entities.

**Application Entity Title** – the externally known name of an *Application Entity*, used to identify a DICOM application to other DICOM applications on the network.

**Application Context** – the specification of the type of communication used between *Application Entities*. Example: DICOM network protocol.

**Association** – a network communication channel set up between *Application Entities*.

**Attribute** – a unit of information in an object definition; a data element identified by a *tag*. The information may be a complex data structure (Sequence), itself composed of lower level data elements. Examples: Patient ID (0010,0020), Accession Number (0008,0050), Photometric Interpretation (0028,0004), Procedure Code Sequence (0008,1032).

**Information Object Definition (IOD)** – the specified set of *Attributes* that comprise a type of data object; does not represent a specific instance of the data object, but rather a class of similar data objects that have the same properties. The *Attributes* may be specified as Mandatory (Type 1), Required but possibly unknown (Type 2), or Optional (Type 3), and there may be conditions associated with the use of an Attribute (Types 1C and 2C). Examples: MR Image IOD, CT Image IOD, Print Job IOD.

**Joint Photographic Experts Group (JPEG)** – a set of standardized image compression techniques, available for use by DICOM applications.

**Media Application Profile** – the specification of DICOM information objects and encoding exchanged on removable media (e.g., CDs)

**Module** – a set of *Attributes* within an *Information Object Definition* that are logically related to each other. Example: Patient Module includes Patient Name, Patient ID, Patient Birth Date, and Patient Sex.

**Negotiation** – first phase of Association establishment that allows *Application Entities* to agree on the types of data to be exchanged and how that data will be encoded.

**Presentation Context** – the set of DICOM network services used over an *Association*, as negotiated between *Application Entities*; includes *Abstract Syntaxes* and *Transfer Syntaxes*.

**Protocol Data Unit (PDU)** – a packet (piece) of a DICOM message sent across the network. Devices must specify the maximum size packet they can receive for DICOM messages.

**Security Profile** – a set of mechanisms, such as encryption, user authentication, or digital signatures, used by an *Application Entity* to ensure confidentiality, integrity, and/or availability of exchanged DICOM data

**Service Class Provider (SCP)** – role of an Application Entity that provides a DICOM network service; typically, a server that performs operations requested by another *Application Entity* (*Service Class User*). Examples: Picture Archiving and Communication System (image storage SCP, and image query/retrieve SCP), Radiology Information System (modality worklist SCP).

**Service Class User (SCU)** – role of an *Application Entity* that uses a DICOM network service; typically, a client. Examples: imaging modality (image storage SCU, and modality worklist SCU), imaging workstation (image query/retrieve SCU)

**Service/Object Pair (SOP) Class** – the specification of the network or media transfer (service) of a particular type of data (object); the fundamental unit of DICOM interoperability specification. Examples: Ultrasound Image Storage Service, Basic Grayscale Print Management.

**Service/Object Pair (SOP) Instance** – an information object; a specific occurrence of information exchanged in a *SOP Class*. Examples: a specific x-ray image.

**Tag** – a 32-bit identifier for a data element, represented as a pair of four digit hexadecimal numbers, the “group” and the “element”. If the “group” number is odd, the tag is for a private (manufacturer-specific) data element. Examples: (0010,0020) [Patient ID], (07FE,0010) [Pixel Data], (0019,0210) [private data element]

**Transfer Syntax** – the encoding used for exchange of DICOM information objects and messages. Examples: JPEG compressed (images), little endian explicit value representation.

**Unique Identifier (UID)** – a globally unique “dotted decimal” string that identifies a specific object or a class of objects; an ISO-8824 Object Identifier. Examples: Study Instance UID, SOP Class UID, SOP Instance UID.

**Value Representation (VR)** – the format type of an individual DICOM data element, such as text, an integer, a person’s name, or a code. DICOM information objects can be transmitted with either explicit identification

of the type of each data element (Explicit VR), or without explicit identification (Implicit VR); with Implicit VR, the receiving application must use a DICOM data dictionary to look up the format of each data element.

### 3.5 BASICS OF DICOM COMMUNICATION

This section describes terminology used in this Conformance Statement for the non-specialist. The key terms used in the Conformance Statement are highlighted in *italics* below. This section is not a substitute for training about DICOM, and it makes many simplifications about the meanings of DICOM terms.

Two *Application Entities* (devices) that want to communicate with each other over a network using DICOM protocol must first agree on several things during an initial network “handshake”. One of the two devices must initiate an *Association* (a connection to the other device), and ask if specific services, information, and encoding can be supported by the other device (*Negotiation*).

DICOM specifies a number of network services and types of information objects, each of which is called an *Abstract Syntax* for the Negotiation. DICOM also specifies a variety of methods for encoding data, denoted *Transfer Syntaxes*. The Negotiation allows the initiating Application Entity to propose combinations of Abstract Syntax and Transfer Syntax to be used on the Association; these combinations are called *Presentation Contexts*. The receiving Application Entity accepts the Presentation Contexts it supports.

For each Presentation Context, the Association Negotiation also allows the devices to agree on *Roles* – which one is the *Service Class User* (SCU – client) and which is the *Service Class Provider* (SCP – server). Normally the device initiating the connection is the SCU, i.e., the client system calls the server, but not always.

The Association Negotiation finally enables exchange of maximum network packet (*PDU*) size, security information, and network service options (called *Extended Negotiation* information).

The Application Entities, having negotiated the Association parameters, may now commence exchanging data. Common data exchanges include queries for worklists and lists of stored images, transfer of image objects and analyses (structured reports), and sending images to film printers. Each exchangeable unit of data is formatted by the sender in accordance with the appropriate *Information Object Definition*, and sent using the negotiated Transfer Syntax. There is a Default Transfer Syntax that all systems must accept, but it may not be the most efficient for some use cases. Each transfer is explicitly acknowledged by the receiver with a *Response Status* indicating success, failure, or that query or retrieve operations are still in process.

Two Application Entities may also communicate with each other by exchanging media (such as a CD-R). Since there is no Association Negotiation possible, they both use a *Media Application Profile* that specifies “pre-negotiated” exchange media format, Abstract Syntax, and Transfer Syntax.

### 3.6 ABBREVIATIONS

Abbreviations are as follows:

AE	Application Entity
AET	Application Entity Title
CAD	Computer Aided Detection
CDA	Clinical Document Architecture
CD-R	Compact Disk Recordable
CSE	Customer Service Engineer
CR	Computed Radiography
CT	Computed Tomography
DHCP	Dynamic Host Configuration Protocol
DICOM	Digital Imaging and Communications in Medicine
DIT	Directory Information Tree (LDAP)
DN	Distinguished Name (LDAP)
DNS	Domain Name System

DX	Digital X-ray
FSC	File-Set Creator
FSU	File-Set Updater
FSR	File-Set Reader
GSDF	Grayscale Standard Display Function
GSPS	Grayscale Softcopy Presentation State
HIS	Hospital Information System
HL7	Health Level 7 Standard
IHE	Integrating the Healthcare Enterprise
IOD	Information Object Definition
IPv4	Internet Protocol version 4
IPv6	Internet Protocol version 6
ISO	International Organization for Standards
IO	Intra-oral X-ray
JPEG	Joint Photographic Experts Group
LDAP	Lightweight Directory Access Protocol
LDIF	LDAP Data Interchange Format
LUT	Look-up Table
MAR	Medication Administration Record
MPEG	Moving Picture Experts Group
MG	Mammography (X-ray)
MPPS	Modality Performed Procedure Step
MR	Magnetic Resonance Imaging
MSPS	Modality Scheduled Procedure Step
MTU	Maximum Transmission Unit (IP)
MWL	Modality Worklist
NM	Nuclear Medicine
NTP	Network Time Protocol
O	Optional (Key Attribute)
OP	Ophthalmic Photography
OSI	Open Systems Interconnection
PACS	Picture Archiving and Communication System
PET	Positron Emission Tomography
PDU	Protocol Data Unit
R	Required (Key Attribute)
RDN	Relative Distinguished Name (LDAP)
RF	Radiofluoroscopy
RIS	Radiology Information System.
RT	Radiotherapy
SC	Secondary Capture
SCP	Service Class Provider

SCU	Service Class User
SOP	Service-Object Pair
SPS	Scheduled Procedure Step
SR	Structured Reporting
TCP/IP	Transmission Control Protocol / Internet Protocol
U	Unique (Key Attribute)
UL	Upper Layer
US	Ultrasound
VL	Visible Light
VR	Value Representation
XA	X-ray Angiography

Some of the tables have a “**Presence of ...**” column in which the following abbreviations are used, unless specified:

VNAP	Not Always Present (attribute sent zero length if no value is present)
ANAP	Not Always Present
ALWAYS	Always Present
EMPTY	Attribute is sent without a value

The abbreviations used in the “**Source**” column:

MWL	the attribute value source is the Modality Worklist
USER	the attribute value comes from the User input
AUTO	the attribute value is generated automatically
CONFIG	the attribute value is a configurable parameter
PROFILE	the attribute value is a parameter found in the profile chosen for the selected printer

### 3.8 IMPLEMENTATION IDENTIFYING INFORMATION

The Implementation Class UID and Implementation Version Name for all the Application Entities can change according to the software build, and are described in the Table 4, that describes also the DCMLab releases present in the various MyLab software builds. Please note that any “X” in the Software build and Implementation Version Name columns stay for a number. Please note some of the listed systems and software builds can be available only for particular countries.

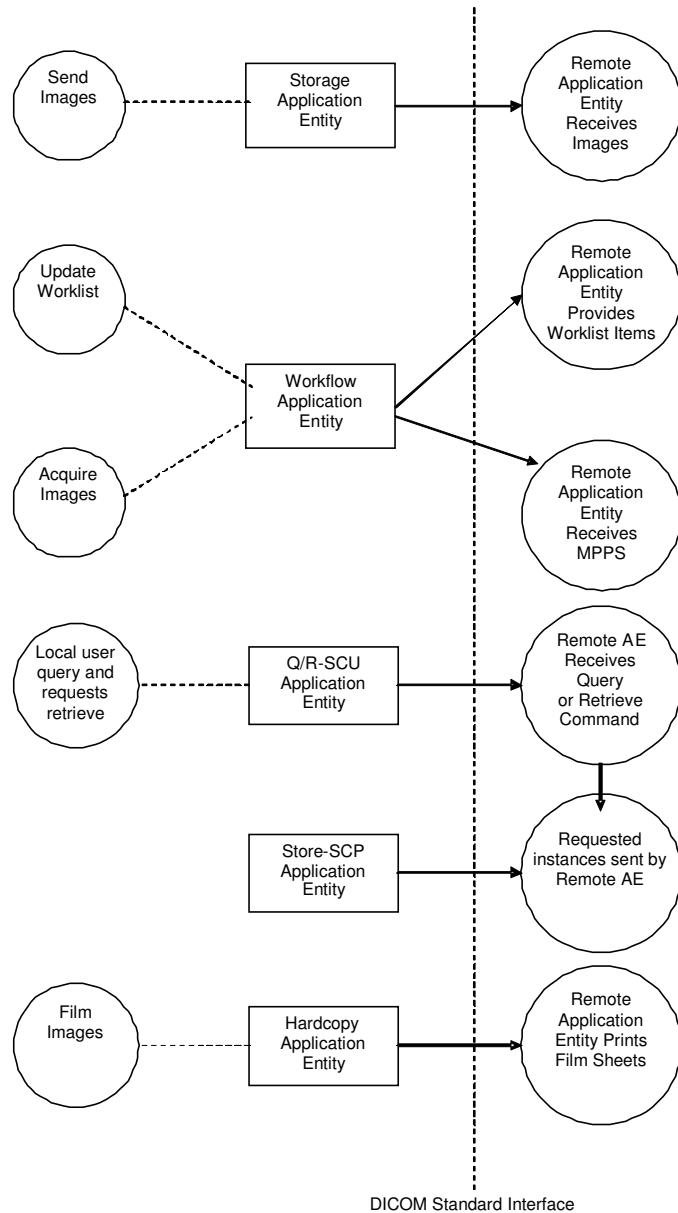

**Table 4**  
**IMPLEMENTATION IDENTIFYING INFORMATION**

## 4 NETWORKING

### 4.1 IMPLEMENTATION MODEL

#### 4.1.1 Application Data Flow <sup>3</sup>

**Figure 1**  
**APPLICATION DATA FLOW DIAGRAM**

- The Storage Application Entity sends images, clips and Structured Report objects <sup>4</sup> to a remote AE. It is associated with the local real-world activity “Send Images”. “Send Images” is performed upon user

<sup>3</sup> Storage Commitment and MPPS SOP Classes not present in VET models.

<sup>4</sup> DICOM Structured Report not available in VET models.

request for each study when closing it, or for specific studies selected from the hard disk database, or (according to the models) directly sending any image and clip as soon as it is acquired and stored into the local database. If a remote AE is configured as a Storage Commitment server, the Storage AE will request Storage Commitment and if a commitment is successfully obtained will record this information in the local database.

- The Workflow Application Entity receives Worklist information from and sends MPPS information<sup>5</sup> to a remote AE. It is associated with the local real-world activities “Update Worklist” and “Acquire Images”. When the “Update Worklist” local real-world activity is performed the Workflow Application Entity queries a remote AE for worklist items and provides the set of worklist items matching the query request. “Update Worklist” is performed as a result of an operator request or can be performed automatically when entering the Worklist panel for selecting the exam to execute. When the “Acquire Images” local real-world activity is performed the Workflow Application Entity creates and updates Modality Performed Procedure Step instances managed by a remote AE. Acquisition of images will result in automated creation of an MPPS Instance. Completion of the MPPS is performed as the result of an operator action.
- The Q/R-SCU Application Entity can query a DICOM Query/Retrieve SCP Application over the network, and then retrieve the instances to the local archive, from which they can be seen.
- The Store-SCP Application Entity can receive over the network from a Storage SCU, the images requested using the Q/R-SCU Application Entity.
- The Hardcopy Application Entity prints images on a remote AE (DICOM Printer). It is associated with the local real-world activity “Film Images”. “Film Images” creates a print-job within the print queue containing one virtual film sheet composed from images selected by the user.

#### 4.1.2 Functional Definition of AEs

##### 4.1.2.1 Functional Definition of Storage Application Entity

It is possible to activate the Storage Application Entity when closing the current study, from the database panel, or directly sending, over a separate association, any image and clip as soon as it is acquired and stored into the local database; in this case the clips acquired during a stress testing protocol and the measurement report (secondary capture images or structured report objects) are sent together, on a further separate association, when closing the study.

When closing the current study, a panel will allow the User to decide if and where to archive the images, clips and Structured Report objects<sup>6</sup>, selecting among “ARCHIVE TO DB” (on the local Hard Disk), “ARCHIVE TO CD/DVD” (the CD-R or the DVD), “ARCHIVE TO USB” and “ARCHIVE TO DICOM SERVER”. Selecting “DB” will store the acquired images in the local database, while selecting “CD/DVD” or “USB” or “DICOM SERVER” will store or send them in DICOM format to the selected destination (without keeping a copy in the local database).

From the local database panel, pressing the “DICOM” soft-key, a “DICOM PROCEDURE” panel will appear, allowing to choose between the following destinations: “CD/DVD” (the CD-R or the DVD), “USB” and “DICOM SERVER”, storing or sending the selected studies (previously archived to the local database, see above), in DICOM format, to the selected destination.

When activating the above described functions choosing “DICOM SERVER”, the SOP Instances associated with the selected study (or studies) will be collected into one send job. The existence of a send job queue entry with associated network destination will activate the Storage AE. An association request will be sent to the destination AE and upon successful negotiation of a Presentation Context the image transfer will be started. If the association cannot be opened, the related send job will be set to an error state and it will be possible to restarted it later by the user via job control interface. The Storage AE will not try to initiate another association for this send job automatically.

---

<sup>5</sup> MPPS SOP Class is not available in VET models.

<sup>6</sup> DICOM Structured Report not available in VET models.

#### 4.1.2.2 Functional Definition of Workflow Application Entity <sup>7</sup>

Worklist Update attempts to download a Worklist from a remote node. If the Workflow AE establishes an Association to a remote AE, it will transfer all worklist items via the open Association. The results will be displayed in a separate list, which will be cleared with the next Worklist Update, if successful. The previously obtained worklist will be kept if for any reason a new one cannot be received: this is done to enable the use of the device also when disconnected from the network. In any case when a worklist item is used to start an exam it will be grayed, so the user, even when the worklist server is not available, can be aware of the already executed exams.

The Workflow AE performs the creation of a MPPS Instance automatically whenever the exam is started. When closing the exam, the MPPS “COMPLETE” or “DISCONTINUED” states can be chosen from the user interface. In case of automatic saving of the exam to a DICOM server, the MPPS message will be “COMPLETE” when one or more images have been acquired, “DISCONTINUED” otherwise.

#### 4.1.2.3 Functional Definition of Store-SCP Application Entity

After sending a retrieve command to a remote Q/R SCP, the Store-SCP waits in the background for connections, will accept associations with Presentation Contexts for SOP Classes of the Storage Service Class, and will store the received instances to the local database where they may subsequently be listed and viewed through the user interface.

#### 4.1.2.4 Functional Definition of Q/R-SCU Application Entity

A connection from the Q/R-SCU to the remote AE is established to execute a query of the remote archive using the decided criteria. When the user selects a study, a connection to the remote AE is established to initiate and monitor the retrieval: the Store-SCP AE receives the retrieved instances.

#### 4.1.2.5 Functional Definition of Hardcopy Application Entity

It is possible to activate the Hardcopy Application Entity both for printing images from the current Study, and for printing a set of images from the local database. In any case, the images belonging to the current Study will not be mixed in the same print-job with the images belonging to older Studies.

On the MyLab keyboard, according to the model, there are one or more print keys; each one can be assigned to a given DICOM printing profile, that is to a given configuration for a given DICOM printer.

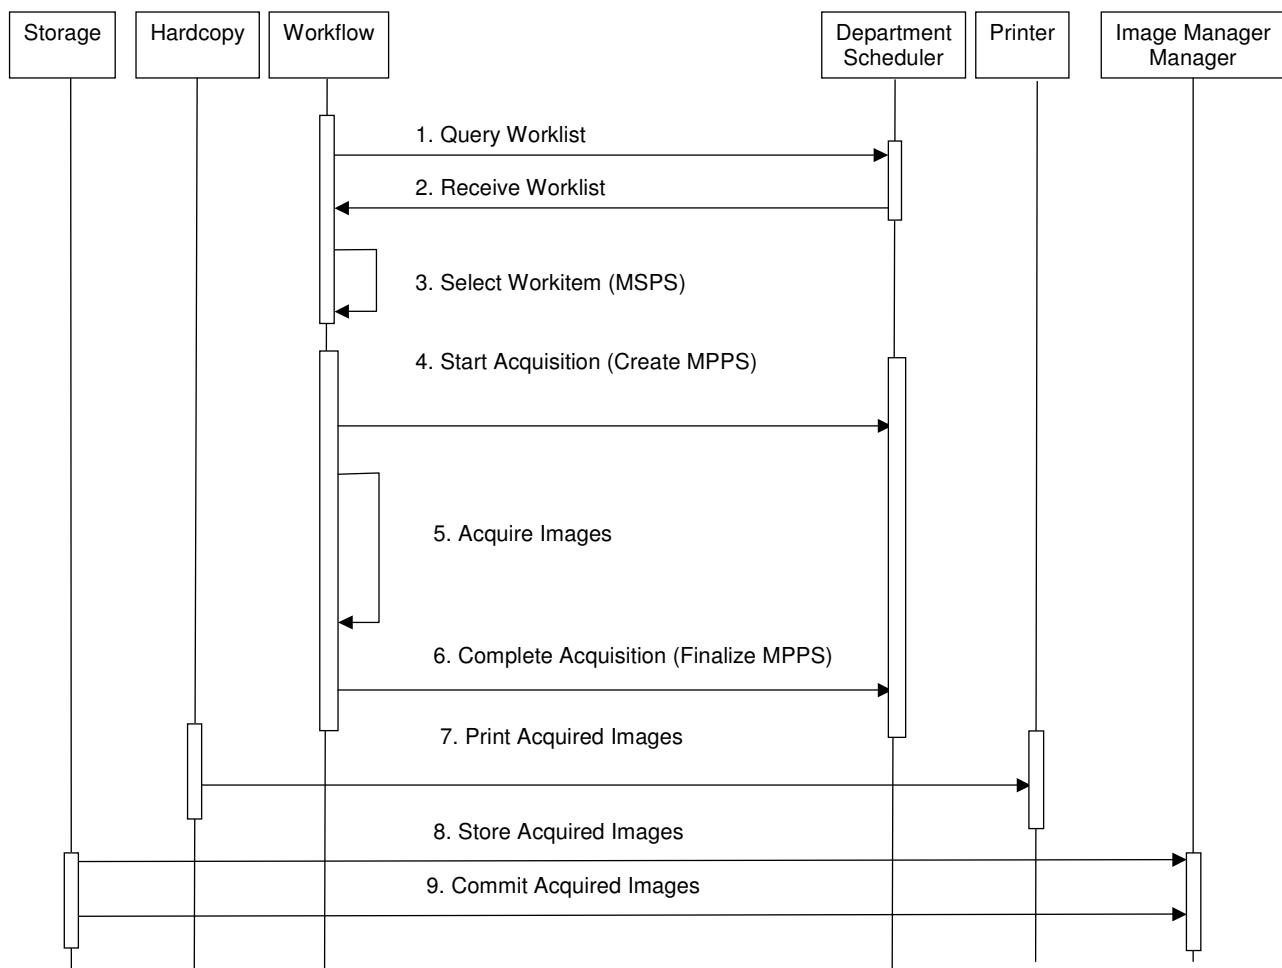

Pressing one of the assigned print keys will add the current visualized image to queue that will be used to compose the film sheet that will be printed according to the selected printing profile. There are different and separated queues for images belonging to the current Study (real-time display, and images selected from the “EXAM REV” environment), and for the images belonging to older Studies (images selected from the “ARCHIVE REV” environment).

When activating the above described keys, the preformatted grayscale or color image (according to the color capability of the corresponding printer) will be added to the print-job being prepared for the selected printing profile. When the number of images requested to fill the film sheet for that printing profile is reached, an association request will be sent to the destination AE, and upon successful negotiation of a Presentation Context the data transfer will be started. If the association cannot be opened, or if some fatal error occurs, the related print-job will be set to an error state, and it will be possible to restart it later by the user via job control interface. The Hardcopy AE will not try to initiate another association for this print-job automatically.

---

<sup>7</sup> MPPS SOP Class not present in VET models.

#### 4.1.3 Sequencing of Real-World Activities <sup>8</sup>

**Figure 2**  
**APPLICATION DATA FLOW DIAGRAM**

Under normal conditions the sequencing constraints illustrated in Figure 2 apply:

1. Query Worklist.
2. Receive Worklist of Modality Scheduled Procedure Steps (MSPS).
3. Select Workitem (MSPS) from Worklist.
4. Start acquisition and create MPPS.
5. Acquire Images.
6. Complete acquisition and finalize MPPS.
7. Print acquired images (optional step).
8. Store acquired images, clips and created Structured Report objects.

<sup>8</sup> Storage Commitment and MPPS SOP Classes not present in VET models.

9. If there is a Storage Commitment server configured and enabled, the Storage AE will request Storage Commitment for the images to it.

Other workflow situations (e.g. unscheduled procedure steps) will have other sequencing constraints. Printing could equally take place after the acquired images have been stored. Printing could be omitted completely if no printer is connected or hardcopies are not required.

Q/R-SCU and Store-SCP activities are performed in a completely independent way from the above activities. The Q/R-SCU activities are sequentially initiated in the user interface, and another activity may not be initiated until the prior activity has completed, including receiving the related images with the Store-SCP.

## 4.2 AE SPECIFICATIONS

### 4.2.1 Storage Application Entity Specification

#### 4.2.1.1 SOP Classes

MyLab provides Standard Conformance to the following SOP Classes:

**Table 5  
SOP CLASSES FOR AE STORAGE**

SOP Class Name	SOP Class UID	SCU	SCP
Ultrasound Image Storage	1.2.840.10008.5.1.4.1.1.6.1	Yes	No
Ultrasound Multiframe Image Storage	1.2.840.10008.5.1.4.1.1.3.1	Yes	No
Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7	Yes	No
Comprehensive SR Storage <sup>9</sup>	1.2.840.10008.5.1.4.1.1.88.33	Yes	No
Storage Commitment Push Model <sup>10</sup>	1.2.840.10008.1.20.1	Yes	No
Verification	1.2.840.10008.1.1	Yes	Yes <sup>11</sup>

#### 4.2.1.2 Association Policies

##### 4.2.1.2.1 General

The DICOM standard application context name for DICOM is always proposed:

**Table 6  
DICOM APPLICATION CONTEXT FOR AE STORAGE**

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

##### 4.2.1.2.2 Number of Associations

MyLab initiates one Association at a time for each destination to which a transfer request is being processed in the active job queue list. Only one job will be active at a time, the other remains pending until the active job is completed or failed.

**Table 7  
NUMBER OF ASSOCIATIONS INITIATED FOR AE STORAGE**

Maximum number of simultaneous Associations	Unlimited
---	-----------

MyLab accepts Associations to receive N-EVENT-REPORT notifications for the Storage Commitment Push Model SOP Class.

##### 4.2.1.2.3 Asynchronous Nature

MyLab does not support asynchronous communication (multiple outstanding transactions over a single Association).

**Table 8  
ASYNCHRONOUS NATURE AS A SCU FOR AE STORAGE**

Maximum number of outstanding asynchronous transactions	1
---	---

<sup>9</sup> Comprehensive SR Storage SOP Class not present in VET models.

<sup>10</sup> Storage Commitment SOP Class not present in VET models.

<sup>11</sup> Only active when the Storage Commitment and/or the Query/Retrieve are enabled.

#### 4.2.1.2.4 Implementation Identifying Information

See section 3.8.

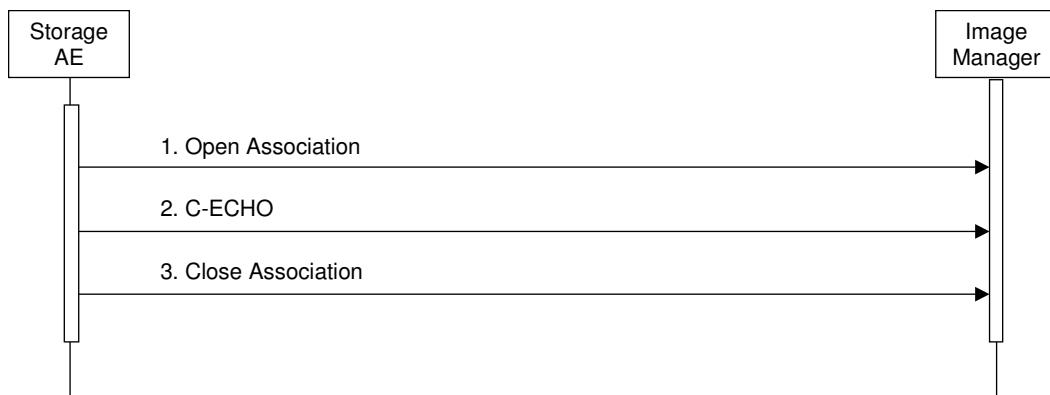

#### 4.2.1.3 Association Initiation Policy

##### 4.2.1.3.1 Activity – Connectivity Verification

###### 4.2.1.3.1.1 Description and Sequencing of Activities

The Storage AE is invoked to perform a verification by the Storage SCP server configuration interface. The job consists of data describing the destination.

If a response to the C-ECHO-RQ is not received within a timeout, the Association will be aborted and an error will be reported to the User.

**Figure 3**  
**SEQUENCING OF ACTIVITY – CONNECTIVITY VERIFICATION**

###### 4.2.1.3.1.2 Proposed Presentation Context Table

The MyLab is capable of proposing the Presentation Contexts as shown in the following table:

**Table 9**  
**PROPOSED PRESENTATION CONTEXT FOR CONNECTIVITY VERIFICATION**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Negot
Name	UID	Name List	UID List		
Verification	1.2.840.10008.1.1	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None

###### 4.2.1.3.1.3 SOP Specific Conformance for Connectivity Verification

The MyLab provides standard conformance to the DICOM Verification Service Class as an SCU. The status code for the C-ECHO is as follows:

**Table 10**  
**C-ECHO RESPONSE STATUS HANDLING BEHAVIOUR**

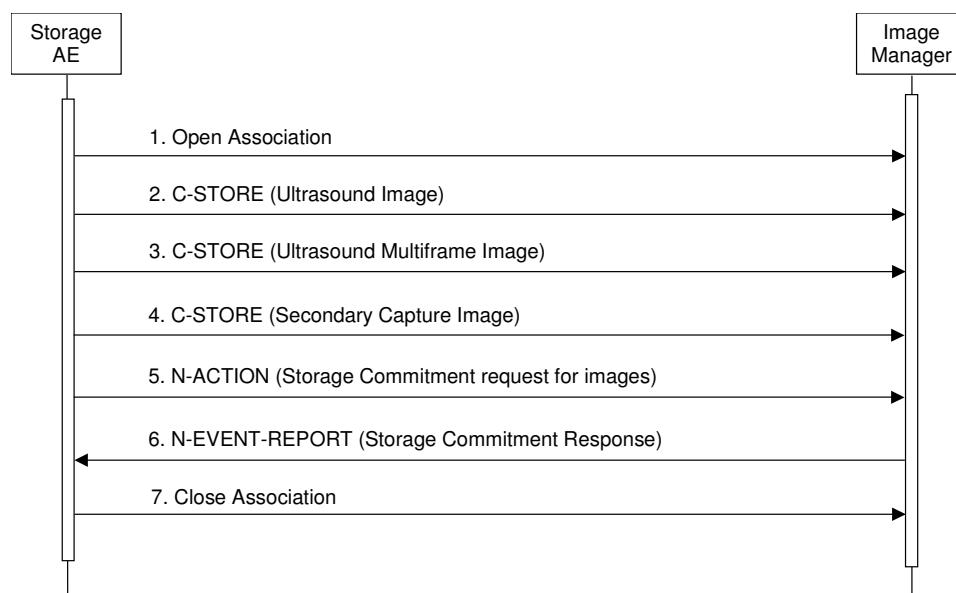

Code	Status	Meaning
0000	Success	The C-ECHO request is accepted.

#### 4.2.1.3.2 Activity – Send Images<sup>12</sup>

##### 4.2.1.3.2.1 Description and Sequencing of Activities

The Storage AE is invoked to send images, clips and SR objects<sup>13</sup> by the job control interface that is responsible for processing network archival tasks. The job consists of data describing the instances marked for storage and the destination. An internal daemon process triggered by a job initiates the procedure to store the instances related to this job. If the process successfully establishes an Association to a remote Application Entity, it will transfer the instances, one after another, via the open Association. If the job contains multiple instances, then multiple C-STORE requests will be issued over the same Association. Status of the transfer is reported through the job control interface. If the Association cannot be established, or one or more C-STORE Responses from the remote Application contain a status other than Success, the related send job is switched to a failed state, deleting from it the images that were successfully sent; it can be restarted at any time by user interaction. If a response is not received within a timeout, the Association will be aborted and the sending of the current instances will be considered failed. In the configuration of the system for each DICOM Store SCP configured there is an AUTOMATIC RETRY check; when enabled, when the association cannot be established for a network problem, or because the server rejects it, or when a network error occurs when sending a file, before immediately switching the job to a failed state, it will be automatically resent after a configurable interval of time, for a configurable number of times; when the number of configured retries has expired without success, the job will be put to a failed state.

If there is a configured Storage Commitment SCP, the Storage AE will, after all images have been sent, transmit a single Storage Commitment request (N-ACTION) over another Association. Upon receiving the N-ACTION response the Storage AE will close the Association. However, the Storage AE is capable of receiving an N-EVENT-REPORT request at any time during an association provided a Presentation Context for the Storage Commitment Push Model has been successfully negotiated (i.e. the N-ACTION is sent at the end of one association and the N-EVENT-REPORT is received during an association initiated for a subsequent send job or during an association initiated by the Remote AE for the specific purpose of sending the N-EVENT-REPORT).

**Figure 4**  
**SEQUENCING OF ACTIVITY – SEND IMAGES**

A possible sequence of interactions between the Storage AE and an Image Manager (e.g. a storage or archive device supporting the Storage and Storage Commitment SOP Classes as an SCP) is illustrated in Figure 4:

<sup>12</sup> Storage Commitment SOP Class not present in VET models.

<sup>13</sup> DICOM Structured Report not available in VET models.

1. The Storage AE opens an association with the Image Manager.
2. A Storage SOP Instance (US, US-MF, SC or SR object) is transmitted to the Image Manager using a C-STORE request and the Image Manager replies with a C-STORE response (status success).
3. Another Storage SOP Instance is transmitted to the Image Manager using a C-STORE request and the Image Manager replies with a C-STORE response (status success).
4. Another Storage SOP Instance is transmitted to the Image Manager using a C-STORE request and the Image Manager replies with a C-STORE response (status success).
5. An N-ACTION request is transmitted to the Image Manager to obtain storage commitment of previously transmitted SOP Instances. The Image Manager replies with a N-ACTION response indicating the request has been received and is being processed.
6. The Image Manager immediately transmits an N-EVENT-REPORT request notifying the Storage AE of the status of the Storage Commitment Request (sent in step 5 using the N-ACTION message). The Storage AE replies with a N-EVENT-REPORT response confirming receipt. The Image Manager could send this message at any time or omit it entirely in favor of transmitting the N-EVENT-REPORT over a separate dedicated association (see note).
7. The Storage AE closes the association with the Image Manager.

**NOTE:** Many other message sequences are possible depending on the number of Storage SOP Instances to be stored. The N-EVENT-REPORT can also be sent over a separate association initiated by the Image Manager (see Section 4.2.1.3.1 on Activity – Receive Storage Commitment Response). The Storage SCP and the Storage Commitment SCP can be different systems.

#### 4.2.1.3.2.2 Proposed Presentation Contexts

MyLab is capable of proposing the Presentation Contexts shown in the following table:

**Table 11**  
**PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY SEND IMAGES**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name List	UID List		
Ultrasound Image Storage	1.2.840.10008.5.1.4.1.1.6.1	JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50	SCU	None
		RLE Lossless Explicit VR LittleEndian Implicit VR LittleEndian	1.2.840.10008.1.2.5 1.2.840.10008.1.2.1 1.2.840.10008.1.2		
		Explicit VR LittleEndian Implicit VR LittleEndian	1.2.840.10008.1.2.1 1.2.840.10008.1.2		
Ultrasound Multiframe Image Storage	1.2.840.10008.5.1.4.1.1.3.1	JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50	SCU	None
Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7	JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50	SCU	None
		RLE Lossless Explicit VR LittleEndian Implicit VR LittleEndian	1.2.840.10008.1.2.5 1.2.840.10008.1.2.1 1.2.840.10008.1.2		
		Explicit VR LittleEndian Implicit VR LittleEndian	1.2.840.10008.1.2.1 1.2.840.10008.1.2		

Comprehensive SR Storage <sup>14</sup>	1.2.840.10008.5. 1.4.1.1.88.33	Explicit VR Little Endian Implicit VR Little Endian	1.2.840.10008.1.2.1 1.2.840.10008.1.2	SCU	None
Storage Commitment Push Model <sup>15</sup>	1.2.840.10008.1. 20.1	Implicit VR Little Endian	1.2.840.10008.1.2	SCU	None

Presentation Context for Ultrasound and Secondary Capture Images can be changed from the User's Interface pressing the MENU button, selecting DICOM CONFIGURATION and entering the QUALITY tab of the configuration panel. For each Storage SCP destination, the following choices are allowed for IMAGE QUALITY:

1. HIGH (UNCOMPRESSED): the Explicit VR Little Endian and the Implicit VR Little Endian will be offered;
2. MEDIUM (LOSSLESS RLE): the RLE, the Explicit VR Little Endian and the Implicit VR Little Endian will be offered;
3. LOW (LOSSY JPEG): only the JPEG lossy Baseline (Process 1) will be offered.

The Presentation Context for Ultrasound Multiframe Images can be changed, for each Storage SCP destination, from the User's Interface pressing the MENU button, selecting DICOM CONFIGURATION and entering the QUALITY tab of the configuration panel. You will find four different settings for CLIP QUALITY; selecting LOW, MEDIUM and HIGH the JPEG lossy Baseline (Process 1) will be offered, with three different compression levels. It is also possible to completely disable the DICOM sending of the clips, to avoid errors with servers that do not support these objects. It is also possible to reduce the frame matrix of the exported clips: for MATRIX SIZE a slider allows to select SMALL, MEDIUM and FULL.

If all the offered Presentation Contexts are not accepted, an error is generated; otherwise, an error is generated only if any of the images to be sent belong to a Presentation Context that has not been accepted. The job failure is logged and reported to the user via the job control application.

#### 4.2.1.3.2.3 SOP Specific Conformance for Image Storage SOP Classes

All Image SOP Classes supported by the Storage AE exhibit the same behavior, except where stated, and are described together in this section.

The behavior of Storage AE when encountering status codes in a C-STORE response is summarized in the Table below:

**Table 12**  
**STORAGE C-STORE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has successfully stored the SOP Instance. If all SOP Instances in a send job have status success then the job is marked as complete.
Refused	Out of Resources	A700-A7FF	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application. This is a transient failure.
Error	Data Set does not match SOP Class	A900-A9FF	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.
Error	Cannot Understand	C000-CFFF	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.

<sup>14</sup> Not present in VET models.

<sup>15</sup> Storage Commitment SOP Class not present in VET models.

Warning	Coercion of Data Elements	B000	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.
Warning	Data Set does not match SOP Class	B007	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.
Warning	Elements Discarded	B006	The send job is marked as failed. The status meaning is logged and the job failure is reported to the user via the job control application.
*	*	Any other status code.	The send job is marked as failed. The status code is logged and the job failure is reported to the user via the job control application.

The behavior of Storage AE during communication failure is summarized in the Table below:

**Table 13  
STORAGE COMMUNICATION FAILURE BEHAVIOR**

Exception	Behavior
Timeout	The connection is aborted and the send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.
Association aborted by the SCP or network layers	The send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.

A failed send job can be restarted by user interaction: only the failed images will be re-sent.

A failed send job can be restarted by user interaction: only the failed images will be re-sent. In the configuration of the system for each DICOM Store SCP configured there is an AUTOMATIC RETRY check; when enabled, when the association cannot be established for a network problem, or because the server rejects it, or when a network error occurs when sending a file, before immediately switching the job to a failed state, it will be automatically re-sent after a configurable interval of time, for a configurable number of times; when the number of configured retries has expired without success, the job will be put to a failed state.

The contents of US Image, US Multiframe Image, Secondary Capture Image and Comprehensive SR Storage SOP Instances created by MyLab conform to the DICOM US, US Multiframe, Secondary Capture Image and Comprehensive SR IOD definitions and are described in section 8.1.

The report with the performed measures can be exported in several ways according to the configuration of the system and the kind of application used to produce it. From the User's Interface, pressing the MENU button, selecting DICOM CONFIGURATION and entering the REPORT tab of the configuration panel, under REPORT EXPORT, for each Storage SCP destination it is possible to select among the following choices:

1. STRUCTURED REPORT<sup>16</sup>: a Comprehensive SR object will be created for applications that allow it (human "CARDIAC", "VASCULAR", "OB-FETAL" and "GYNECOLOGY"), while the report will be written in the pixels of one or more Secondary Capture images for the other applications. By checking "ADD MEASUREMENT FILE" the report will also be added into the proprietary attributes contained in the SR object (when produced), in the original proprietary format; this is intended to provide specific applications supported by Esaote the way to get the complete report in the Esaote format;
2. DICOM VIEWER COMPATIBLE IMAGE: the report will be written in a human readable way into the pixels of one or more Secondary Capture images, that will be sent together with the exam;
3. NONE: the report will not be sent at all;

<sup>16</sup> DICOM Structured Report not available in VET models.

#### 4.2.1.3.2.4 SOP Specific Conformance for Storage Commitment SOP Class<sup>17</sup>

##### 4.2.1.3.2.4.1 Storage Commitment Operations (N-ACTION)

The Storage AE will request storage commitment for instances of the Ultrasound, Ultrasound Multiframe, Secondary Capture Image and Comprehensive SR<sup>18</sup> Storage SOP Classes if there is a Remote AE configured as a Storage Commitment server (SCP) and a presentation context for the Storage Commitment Push Model has been accepted.

The Storage AE will consider Storage Commitment failed if no N-EVENT-REPORT is received for a Transaction UID within a configurable time period after receiving a successful N-ACTION response (duration of applicability for a Transaction UID).

The Storage AE does not send the optional Storage Media FileSet ID & UID Attributes or the Referenced Study Component Sequence Attribute in the N-ACTION.

The list of the jobs for which a Storage Commitment request (N-ACTION) has been successfully sent to the Storage Commitment SCP can be accessed right clicking the DICOM Network icon, and selecting (only in the Archive Review environment) STORAGE COMMITMENT SUMMARY. For each job there is a status that can be IN PROGRESS, FAILED or COMPLETED. Selecting one of the items of this list and clicking DETAILS opens a panel in which the complete list of the SOP Instance UIDs for that job is present.

The behavior of Storage AE when encountering status codes in a N-ACTION response is summarized in the Table below:

**Table 14  
STORAGE COMMITMENT N-ACTION RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The request for storage comment is considered successfully sent. A timer is started which will expire if no N-EVENT-REPORT for the Transaction UID is received within a configurable timeout period.
*	*	Any other status code.	The Association is aborted using A-ABORT and the request for storage comment is marked as failed. The status meaning is logged and reported to the user via the job control application.

The behavior of Storage AE during communication failure is summarized in the Table below:

**Table 15  
STORAGE COMMUNICATION FAILURE BEHAVIOR**

Exception	Behavior
Timeout	The Association is aborted using A-ABORT and the send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.
Association aborted by the SCP or network layers	The send job is marked as failed. The reason is logged and the job failure is reported to the user via the job control application.

<sup>17</sup> Storage Commitment SOP Class not present in VET models.

<sup>18</sup> DICOM Structured Report not available in VET models.

#### 4.2.1.3.2.4.2 Storage Commitment Notifications (N-EVENT-REPORT)

The Storage AE is capable of receiving an N-EVENT-REPORT notification if it has successfully negotiated a Presentation Context for the Storage Commitment Push Model.

Upon receipt of a N-EVENT-REPORT the timer associated with the Transaction UID will be canceled.

The behavior of Storage AE when receiving Event Types within the N-EVENT-REPORT is summarized in the Table below.

**Table 16  
STORAGE COMMITMENT N-EVENT-REPORT BEHAVIOUR**

Event Type Name	Event Type ID	Behavior
Storage Commitment Request Successful	1	The Referenced SOP Instances under Referenced SOP Sequence (0008,1199) are marked within the STORAGE COMMITMENT SUMMARY list as "COMPLETED". Successfully committed SOP Instances are candidates for deletion from the local database.
Storage Commitment Request Complete – Failures Exist	2	The Referenced SOP Instances under Referenced SOP Sequence (0008,1199) are treated in the same way as in the success case (Event Type 1). The Referenced SOP Instances under Failed SOP Sequence (0008,1198) are marked within the STORAGE COMMITMENT SUMMARY - DETAILS as "FAILED". A send job that failed storage commitment will not be automatically restarted but can be restarted by user interaction.

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in the Table below.

**Table 17  
STORAGE COMMITMENT N-EVENT-REPORT RESPONSE STATUS REASONS**

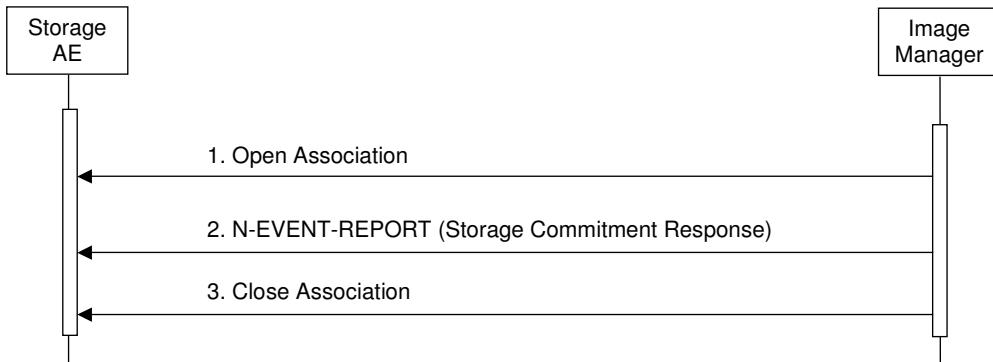

Service Status	Further Meaning	Error Code	Reasons
Success	Success	0000	The storage commitment result has been successfully received.
Failure	Unrecognized Operation	0211H	The Transaction UID in the N-EVENT-REPORT request is not recognized (was never issued within an N-ACTION request).
Failure	Resource Limitation	0213H	The Transaction UID in the N-EVENT-REPORT request has expired (no N-EVENT-REPORT was received within a configurable time limit).
Failure	No Such Event Type	0113H	An invalid Event Type ID was supplied in the N-EVENT-REPORT request.
Failure	Processing Failure	0110H	An internal error occurred during processing of the N-EVENT-REPORT. A short description of the error will be returned in Error Comment (0000,0902).
Failure	Invalid Argument Value	0115H	One or more SOP Instance UIDs with the Referenced SOP Sequence (0008,1199) or Failed SOP Sequence (0008,1198) was not included in the Storage Commitment Request associated with this Transaction UID. The unrecognized SOP Instance UIDs will be returned within the Event Information of the N-EVENT-REPORT response.

#### 4.2.1.3 Association Acceptance Policy <sup>19</sup>

##### 4.2.1.3.1 Activity – Receive Storage Commitment Response

###### 4.2.1.3.1.1 Description and Sequencing of Activities

The Storage AE will accept associations in order to receive responses to a Storage Commitment Request.

**Figure 5  
SEQUENCING OF ACTIVITY - RECEIVE STORAGE COMMITMENT RESPONSE**

A possible sequence of interactions between the Storage AE and an Image Manager (e.g. a storage or archive device supporting Storage Commitment SOP Classes as an SCP) is illustrated in the Figure above:

1. The Image Manager opens a new association with the Storage AE.
2. The Image Manager sends an N-EVENT-REPORT request notifying the Storage AE of the status of a previous Storage Commitment Request. The Storage AE replies with a N-EVENT-REPORT response confirming receipt.
3. The Image Manager closes the association with the Storage AE.

The Storage AE may reject association attempts as shown in the Table below. The Result, Source and Reason/Diag columns represent the values returned in the appropriate fields of an ASSOCIATE-RJ PDU (see PS 3.8, Section 9.3.4). The contents of the Source column is abbreviated to save space and the meaning of the abbreviations are:

- a) 1 – DICOM UL service-user
- b) 2 – DICOM UL service-provider (ASCE related function)
- c) 3 – DICOM UL service-provider (Presentation related function)

**Table 18  
ASSOCIATION REJECTION REASONS**

Result	Source	Reason/Diag	Explanation
2 – rejected-transient	c	2 – local-limit-exceeded	The (configurable) maximum number of simultaneous associations has been reached. An association request with the same parameters may succeed at a later time.
2 – rejected-transient	c	1 – temporary-congestion	No associations can be accepted at this time due to the real-time requirements of higher priority activities (e.g. during image acquisition no associations will be accepted) or because insufficient resources are available (e.g. memory, processes, threads). An association request with the same parameters

<sup>19</sup> The Storage AE will not accept associations when Storage Commitment SOP Class is not present or not enabled.

			may succeed at a later time.
1 – rejected-permanent	a	2 – application-context-name-not-supported	The association request contained an unsupported Application Context Name. An association request with the same parameters will not succeed at a later time.
1 – rejected-permanent	a	7 – called-AE-title-not-recognized	The association request contained an unrecognized Called AE Title. An association request with the same parameters will not succeed at a later time unless configuration changes are made. This rejection reason normally occurs when the association initiator is incorrectly configured and attempts to address the association acceptor using the wrong AE Title.
1 – rejected-permanent	a	3 – calling-AE-title-not-recognized	The association request contained an unrecognized Calling AE Title. An association request with the same parameters will not succeed at a later time unless configuration changes are made. This rejection reason normally occurs when the association acceptor has not been configured to recognize the AE Title of the association initiator.
1 – rejected-permanent	b	1 – no-reason-given	The association request could not be parsed. An association request with the same format will not succeed at a later time.

#### 4.2.1.3.1.2 Accepted Presentation Contexts

The Storage AE will accept Presentation Contexts as shown in the Table below.

**Table 19  
ACCEPTABLE PRESENTATION CONTEXTS FOR  
ACTIVITY RECEIVE STORAGE COMMITMENT RESPONSE**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name List	UID List		
Storage Commitment Push Model	1.2.840.10008.1.20.1	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None
Verification	1.2.840.10008.1.1	Implicit VR LittleEndian	1.2.840.10008.1.2	SCP	None

The Storage AE will only accept the SCU role (which must be proposed via SCP/SCU Role Selection Negotiation) within a Presentation Context for the Storage Commitment Push Model SOP Class.

#### 4.2.1.3.1.3 SOP Specific Conformance for Storage Commitment SOP Class

#### 4.2.1.3.1.4 Storage Commitment Notifications (N-EVENT-REPORT)

Upon receipt of a N-EVENT-REPORT the timer associated with the Transaction UID will be canceled, and the job will be marked as “COMPLETED” in the STORAGE COMMITMENT SUMMARY list. Otherwise, when the timer reaches the configured timeout value before reaching any response, the job will be marked as “FAILED”.

The behavior of Storage AE when receiving Event Types within the N-EVENT-REPORT is summarized in Table 17.

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in Table 18.

#### 4.2.2 Store-SCP Application Entity Specification

##### 4.2.2.1 SOP Classes

Store-SCP provide Standard Conformance to the following SOP Class(es):

**Table 1  
SOP CLASSES SUPPORTED BY STORE-SCP**

SOP Class Name	SOP Class UID	SCU	SCP
US Image Storage	1.2.840.10008.5.1.4.1.1.6.1	No	Yes
Ultrasound Multi-frame Image Storage	1.2.840.10008.5.1.4.1.1.3.1	No	Yes
Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7	No	Yes

##### 4.2.2.2 Association Policies

###### 4.2.2.2.1 General

Store-SCP accepts but never initiates associations.

**Table 2  
MAXIMUM PDU SIZE RECEIVED AS A SCP FOR STORE-SCP**

Maximum PDU size received	128 Kbytes
---------------------------	------------

###### 4.2.2.2.2 Number of Associations

**Table 3  
NUMBER OF ASSOCIATIONS AS A SCP FOR STORE-SCP**

Maximum number of simultaneous associations	1
---	---

###### 4.2.2.2.3 Asynchronous Nature

Store-SCP will only allow a single outstanding operation on an Association. Therefore, Store-SCP will not perform asynchronous operations window negotiation.

###### 4.2.2.2.4 Implementation Identifying Information

See Section 3.8.

###### 4.2.2.3 Association Initiation Policy

Store-SCP does not initiate associations.

###### 4.2.2.4 Association Acceptance Policy

When Store-SCP accepts an association, it will respond to storage requests. If the Called AE Title does not match the pre-configured AE Title, and the Calling AE Title is not present in the configuration table, the association will be rejected.

###### 4.2.2.4.1 Activity – Receive Storage Request

###### 4.2.2.4.1.1 Description and Sequencing of Activities

As instances are received they are copied to the local file system and a record inserted into the local database. If the received instance is a duplicate of a previously received instance, the new instance will be rejected.

#### 4.2.2.4.1.2 Accepted Presentation Contexts

**Table 4  
ACCEPTABLE PRESENTATION CONTEXTS FOR  
STORE-SCP AND RECEIVE STORAGE REQUEST**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Extended Negotiation
Name	UID	Name	UID		
US Image Storage	1.2.840.10008.5.1.4. 1.1.6.1	Implicit VR Little Endian	1.2.840.10008.1.2	SCP	None
		Explicit VR Little Endian	1.2.840.10008.1.2.1	SCP	None
		JPEG Lossy Baseline	1.2.840.10008.1.2.4.50	SCP	None
		RLE	1.2.840.10008.1.2.5	SCP	None
Secondary Capture Image Storage	1.2.840.10008.5.1.4. 1.1.7	Same as above	Same as above	SCP	None
US Multi-Frame Image Storage	1.2.840.10008.5.1.4. 1.1.3.1	JPEG lossy Baseline	1.2.840.10008.1.2.4.50	SCP	None

#### 4.2.2.4.1.2.1 Extended Negotiation

No extended negotiation is performed, though Store-SCP:

- is a Level 2 Storage SCP (Full – does not discard any data elements)
- does not support digital signatures
- does not coerce any received data elements

#### 4.2.2.4.1.3 SOP Specific Conformance

##### 4.2.2.4.1.3.1 SOP Specific Conformance to Storage SOP Classes

Store-SCP provides standard conformance to the Storage Service Class.

##### 4.2.2.4.1.3.2 Presentation Context Acceptance Criterion

All the above listed presentation contexts will be accepted.

##### 4.2.2.4.1.3.3 Transfer Syntax Selection Policies

The Store-SCP AE will place the highest priority on the first syntax listed in the Accepted Presentation Contexts Table above, and decreasing priority on the following syntaxes.

##### 4.2.2.4.1.3.4 Response Status

Store-SCP will behave as described in the Table below when generating the C-STORE response command message.

**Table 5  
RESPONSE STATUS FOR STORE-SCP AND RECEIVE STORAGE REQUEST**

Service Status	Further Meaning	Status Codes	Reason
Refused	Out of Resources	A7xx	Never sent
Error	Data Set does not match SOP Class	A9xx	Never sent – data set is not checked prior to storage

	Cannot understand	Cxxx	The request was not processed.
	Client not authorized	0100	Not authorized to store images.
	Instance already in archive	0110	Instances already in archive will be rejected.
Warning	Coercion of Data Elements	B000	Never sent - no coercion is ever performed
	Data Set does not match SOP Class	B007	Never sent - data set is not checked prior to storage
	Elements Discarded	B006	Never sent – all elements are always stored
Success		0000	

#### 4.2.3 Q/R-SCU Application Entity Specification

Q/R-SCU AE provides Standard Conformance to the following DICOM SOP Classes:

**Table 6  
SOP CLASSES SUPPORTED BY Q/R-SCU**

SOP Class Name	SOP Class UID	SCU	SCP
Study Root Query/Retrieve Information Model - FIND	1.2.840.10008.5.1.4.1.2.2.1	Yes	No
Study Root Query/Retrieve Information Model - MOVE	1.2.840.10008.5.1.4.1.2.2.2	Yes	No

##### 4.2.3.1 Association Establishment Policies

###### 4.2.3.1.1 General

Q/R-SCU initiates but never accepts associations. SOP class extended negotiation is not supported.

The configuration of the system defines all the Application Entity Titles with which this AE can establish associations. Included in the configuration are the different AE's IP host names and TCP port numbers on which the remote AE's are listening for incoming DICOM associations. If a particular remote AE definition in the configuration does not include a TCP port number, then Q/R-SCU AE can't request an association with the remote AE. The configuration allows also to change the port number used to listen for incoming stores after a retrieve request: this port is the same used by the Store-SCP AE.

###### 4.2.3.1.2 Number of Associations

Only one association at the same time is allowed.

###### 4.2.3.1.3 Asynchronous Nature

Q/R-SCU AE uses only synchronous mode of operation. If a remote AE specifies asynchronous operations in its association request, Q/R-SCU AE responds with no asynchronous operation's entry in the association response (this implies that only synchronous operations are supported).

###### 4.2.3.1.4 Implementation Identifying Information

See Section 3.8.

##### 4.2.3.2 Association Initiation Policy

Q/R-SCU AE uses a list of valid query/retrieve servers. User can select one of them, the system save these settings so the user does not need to set them for every request or after every startup.

Q/R-SCU AE starts an association for every request of query or retrieval.

###### 4.2.3.2.1 Real-world Activity "query"

###### 4.2.3.2.1.1 Associated Real-world Activity

The system initiates a query operation in response to user activity.

This operation will cause Q/R-SCU AE to:

- Build a list of identifiers to query
- initiate a DICOM association with the remote server
- send a C-FIND command with the identifiers and query level
- get the results and release the association.

###### 4.2.3.2.1.2 Proposed Presentation Contexts

Q/R-SCU AE will propose the presentation contexts listed in the following Presentation Context Table for Query/Retrieve Service Class as Query SCU:

**Table 7**  
**Proposed Presentation Contexts for Q/R-SCU**

<b>Presentation Context Table</b>					
<b>Abstract Syntax</b>		<b>Transfer Syntax</b>		<b>Role</b>	<b>Extended Negotiation</b>
<b>Name</b>	<b>UID</b>	<b>Name</b>	<b>UID</b>		
Study Root Query/Retrieve Information Model - FIND	1.2.840.10008.5.1.4.1. 2.2.1	Implicit VR Little Endian	1.2.840.10008.1.2	SCU	None
		Explicit VR Little Endian	1.2.840.10008.1.2.1		None

#### 4.2.3.2.1.3 SOP Specific Conformance for Query SOP Classes

Q/R-SCU AE has the following behavior when querying a remote AE:

- Following the remote AE accepting the proposed association, it will send a C-FIND operation with the identifier list created from the user interface.
- Results list returned will be displayed to the user.
- The association will be released.

#### 4.2.3.3 Real-world Activity “retrieve”

##### 4.2.3.3.1 Associated Real-world Activity

The system initiates a retrieve operation in response to user activity.

This operation will cause Q/R-SCU AE to:

- Build a list of instances to retrieve
- initiate a DICOM association with the remote server
- create a thread to listen for C-STORE commands from the remote server
- send a C-MOVE command with the instances
- receive C-STORE commands from the remote server
- get the C-MOVE results and release the association.

#### 4.2.3.3.2 Proposed Presentation Contexts

Q/R-SCU AE will propose the presentation context listed in the following Presentation Context Table for Query/Retrieve Service Class as Retrieve SCU:

**Table 8**  
**Proposed Presentation Contexts for Q/R-SCU**

<b>Presentation Context Table</b>					
<b>Abstract Syntax</b>		<b>Transfer Syntax</b>		<b>Role</b>	<b>Extended Negotiation</b>
<b>Name</b>	<b>UID</b>	<b>Name</b>	<b>UID</b>		
Study Root Query/Retrieve – MOVE	1.2.840.10008.5.1.4.1. 2.2.2	Implicit VR Little Endian	1.2.840.10008.1.2	SCU	None
		Explicit VR Little Endian	1.2.840.10008.1.2.1		None

#### 4.2.3.3.3 SOP Specific Conformance for Retrieve SOP Classes

Q/R-SCU AE has the following behavior when retrieving images from storage on a remote AE:

- Following the remote AE accepting the proposed association, it will create a thread to listen for the C-STORE operations returning the images.
- AE will perform a C-MOVE operation sending the identifier list created from the user interface.
- Images stored to the listener thread will be displayed.

- When the C-MOVE command has received all results or been aborted, the listener thread will be terminated.
- The association will be released.

#### **4.2.3.3.4 Association Acceptance Policy**

Q/R-SCU AE accept associations only for retrieve purposes. Anyway, for the same TCP Port and AE Title, the Storage SCP AE is always listening for associations to receive solicited and unsolicited instances.

#### **4.2.3.3.5 SOP Specific Conformance for Retrieve SOP Classes**

Q/R-SCU AE will monitor the Store-SCP Application Entity to verify that the requested instances have been received, adding them to the local database, or to a temporary storage area, according to the User's request.

#### 4.2.4 Workflow Application Entity Specification <sup>20</sup>

##### 4.2.4.1 SOP Classes

MyLab provides Standard Conformance to the following SOP Classes:

**Table 20  
SOP CLASSES FOR AE WORKFLOW**

SOP Class Name	SOP Class UID	SCU	SCP
Modality Worklist Information Model – FIND	1.2.840.10008.5.1.4.31	Yes	No
Modality Performed Procedure Step <sup>21</sup>	1.2.840.10008.3.1.2.3.3	Yes	No

##### 4.2.4.2 Association Policies

###### 4.2.4.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 21  
DICOM APPLICATION CONTEXT FOR AE WORKFLOW**

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

###### 4.2.4.2.2 Number of Associations

MyLab initiates one Association at a time for a Worklist request.

**Table 22  
NUMBER OF ASSOCIATIONS INITIATED FOR AE WORKFLOW**

Maximum number of simultaneous Associations	1
---	---

###### 4.2.4.2.3 Asynchronous Nature

MyLab does not support asynchronous communication (multiple outstanding transactions over a single Association).

**Table 23  
ASYNCHRONOUS NATURE AS A SCU FOR AE WORKFLOW**

Maximum number of outstanding asynchronous transactions	1
---	---

###### 4.2.4.2.4 Implementation Identifying Information

See section 3.8.

##### 4.2.4.3 Association Initiation Policy

###### 4.2.4.3.1 Activity – Worklist Update

###### 4.2.4.3.1.1 Description and Sequencing of Activities

The request for a Worklist Update is initiated by user interaction (broad query), or automatically when starting an exam selected among the previously requested worklist items (narrow query). Pressing the “WORKLIST”

<sup>20</sup> MPPS SOP Class not present in VET models.

<sup>21</sup> MPPS SOP Class not present in VET models.

soft key in the PATIENT DATA panel, the WORKLIST QUERY panel appears. Pressing the button "QUERY" in this panel issues a broad worklist query to the configured worklist server.

It is possible to configure the system to automatically execute the broad worklist query whenever the User opens the Worklist panel, by checking "QUERY AT START" in the panel itself. Otherwise, the results of the latest worklist query (if any) will appear until you press "QUERY".

The "SHOW QUERY PARAMETERS" in the WORKLIST QUERY panel will display a "QUERY PARAMETERS" panel for entering data as search criteria. When the QUERY is pressed, the data from the panel will be inserted as matching keys into the query. In the QUERY PARAMETERS panel there is a "RESET" button to reset the query parameters to the default (current day for the Scheduled Procedure Step Start Date, local AE Title of the MyLab for the Scheduled Station AE Title).

With broad worklist queries the MyLab system always requests all items that match the matching keys in the table below:

**Table 24  
BROAD WORKLIST QUERY MATCHING KEYS**

Tag	Attribute	Contents
(0008,0005)	Specific Character Set	"ISO_IR 100" or "ISO_IR 144" <sup>22</sup>
(0008,0050)	Accession Number	empty, can be set
(0008,0060)	Modality	pre-set to "US" but can be changed or blanked
(0040,0006)	Scheduled Performing Physician's Name	empty, can be set
(0010,0010)	Patient's Name	empty, can be set
(0010,0020)	Patient ID	empty, can be set
(0040,0002)	Scheduled Procedure Step Start Date	present date, can be modified
(0040,0001)	Scheduled Station AE Title	Local AE Title, can be modified
(0040,1001)	Requested Procedure ID	empty, can be set

Upon initiation of the request, the MyLab will build an Identifier for the C-FIND request, using the above matching keys and the return keys in Table 30. Then it will initiate an Association to send the request and will wait for Worklist responses. After retrieval of all responses, MyLab will display them in the WORKLIST QUERY panel, showing for each Scheduled Procedure Step the Patient Name, sex, Scheduled Performing Physician, Scheduled Procedure Step Start Date and Time, Scheduled Procedure Step ID, Accession Number, and a STATUS information flag that identifies with "WARNING" the received Scheduled Procedure Steps in which some mandatory attributes are missing. For every item it is possible to show the other information received by selecting it and pressing "DETAILS": in this panel, in case of missing mandatory attributes in the response, there will also be the list of them. Even if some information, while mandatory for the SCP, is not provided by it, the MyLab will allow executing it by using the values that would be used for an unscheduled exam. In case of corrupted C-FIND-RSP messages, in the WORKLIST panel a message will appear saying that some of the records are corrupted.

The results will be cleared with the next worklist update. The previously obtained worklist will be kept if for any reason a new one cannot be received: this is done to enable the use of the device also when disconnected from the network. In any case when a worklist item is used to start an exam it will be grayed, so the user, even when the worklist server is not available, can be aware of the already executed exams.

<sup>22</sup> Set to "ISO\_IR 100" when the system is set to use a Latin keyboard or to "ISO\_IR 144" when it is set to use a Cyrillic keyboard. It is not intended to be a matching key. When any C-FIND-RSP contains a different character set of the one in the query, a warning will result, and the characters that cannot be mapped into the current character set will be substituted by a question mark "?". When the any C-FIND-RSP does not contain the (0008,0005) Specific Character Set, the received data are treated as their (0008,0005) Specific Character Set correspond to the current settings of the MyLab.

It is possible to configure the system to automatically execute a narrow worklist query whenever the User starts an exam, by checking “REFRESH DATA WHEN STARTING AN EXAM” in the worklist Worklist server configuration. In this case each time a record is selected to use it for starting an exam using its data, a narrow query will be performed to verify that the information still corresponds to the selected record. In case of any difference, a broad query is automatically issued and the User is requested to select again the exam to start.

It is also possible to configure the system to force the user to insert some details in the worklist query panel, to avoid getting too many responses from a worklist server that has a huge number of scheduled procedure steps registered. This can be done accessing the DICOM configuration panel: for each DICOM MWL SCP configured there is a “FORCE DETAILS” check; when checked the sw verifies that in the at least one among Patient Last Name, Patient ID and Accession number in the worklist panel contains a string. In case all these three attributes are empty, an error message appears.

**Table 25  
NARROW WORKLIST QUERY MATCHING KEYS**

Tag	Attribute	Contents	Matching Key Type
(0008,0005)	Specific Character Ser	“ISO_IR 100” or “ISO_IR 144”	=
(0040,0002)	Scheduled Procedure Step Start Date	the same used in the broad query	R
(0008,0060)	Modality	the same used in the broad query	R
(0010,0020)	Patient ID	from the selected result of the broad query	R
(0040,0001)	Scheduled Station AE Title	from the selected result of the broad query	R
(0008,0050)	Accession Number	from the selected result of the broad query	O

It is also possible to configure the system to periodically query the worklist server in background, so that when opening the worklist panel you immediately get fresh data without having to wait.

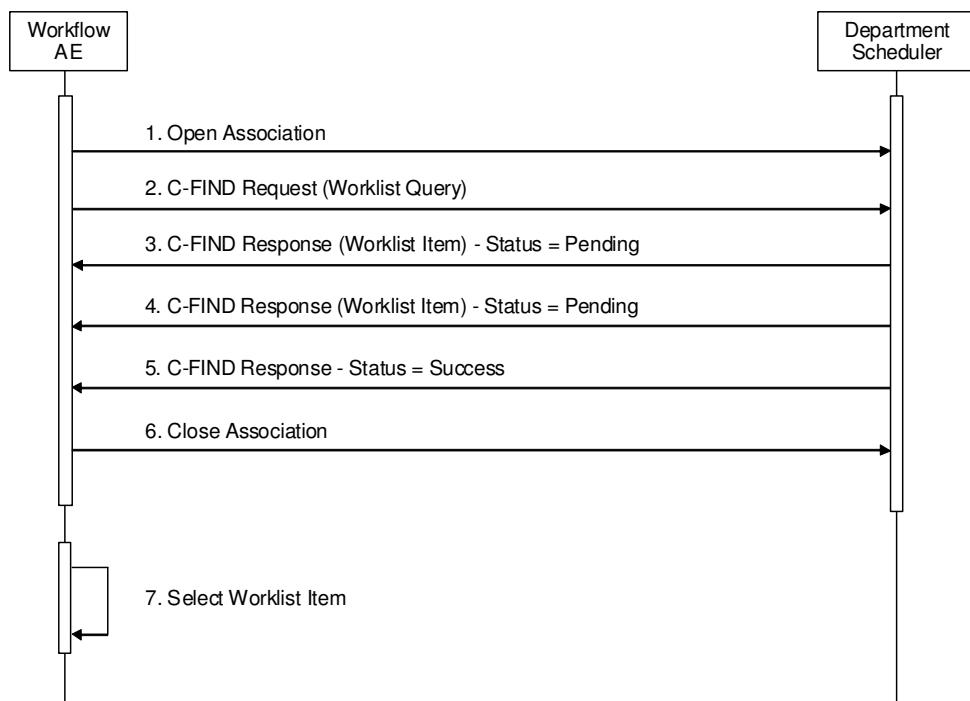

**Table 26  
BACKGROUND WORKLIST QUERY MATCHING KEYS**

Tag	Attribute	Contents
(0008,0005)	Specific Character Ser	“ISO_IR 100” or “ISO_IR 144”
(0008,0060)	Modality	pre-set to “US” but can be changed or blanked
(0040,0006)	Scheduled Performing Physician’s Name	empty, can be set
(0040,0002)	Scheduled Procedure Step Start Date	present date
(0040,0001)	Scheduled Station AE Title	Local AE Title, can be modified

Upon initiation of the request, the MyLab system will build an Identifier for the C-FIND request, using the above matching keys and the return keys in Table 30. Then it will initiate an Association to send the request and will wait for Worklist responses. After retrieval of all the responses, the MyLab system filters them for the same Patient ID, Accession Number, Scheduled Procedure Step Start Date, Scheduled Procedure Step Start Time, in order to identify the response that matches with the item selected in the broad query.

If from the narrow query, after filtering the responses as above, there are none or more than one matching the selected item, or some of the relevant information in the return keys have changed since the broad query, a warning message will be shown, a broad query will automatically be issued, and the User will be asked to select the exam again, to be sure all the information is coherent with the one contained in the Worklist Server.

For the broad, narrow and background queries, the MyLab system will initiate an Association in order to issue a C-FIND request according to the Modality Worklist Information Model.

**Figure 6**  
**SEQUENCING OF ACTIVITY – WORKLIST UPDATE**

A possible sequence of interactions between the Workflow AE and a Departmental Scheduler (e.g. a device such as a RIS or HIS which supports the Modality Worklist SOP Class as an SCP) is illustrated in the Figure above:

1. The Workflow AE opens an association with the Departmental Scheduler
2. The Workflow AE sends a C-FIND request to the Departmental Scheduler containing the Worklist Query attributes.
3. The Departmental Scheduler returns a C-FIND response containing the requested attributes of the first matching Worklist Item.
4. The Departmental Scheduler returns another C-FIND response containing the requested attributes of the second matching Worklist Item.
5. The Departmental Scheduler returns another C-FIND response with status Success indicating that no further matching Worklist Items exist. This example assumes that only 2 Worklist items match the Worklist Query.
6. The Workflow AE closes the association with the Departmental Scheduler.
7. The user selects a Worklist Item from the Worklist and prepares to acquire new images.

#### 4.2.4.3.1.2 Proposed Presentation Contexts

MyLab will propose Presentation Contexts as shown in the following table:

**Table 27  
PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY WORKLIST UPDATE**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name List	UID List		
Modality Worklist Information Model – FIND	1.2.840.10008.5.1.4.31	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None

#### 4.2.4.3.1.3 SOP Specific Conformance for Modality Worklist

The behavior of the MyLab when encountering status codes in a Modality Worklist C-FIND response is summarized in the Table below. If any other SCP response status than "Success" or "Pending" is received by the MyLab, a message "query failed" will appear on the user interface.

**Table 28  
MODALITY WORKLIST C-FIND RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Matching is complete	0000	The SCP has completed the matches. Worklist items are available for display or further processing.
Refused	Out of Resources	A700	The Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged.
Failed	Identifier does not match SOP Class	A900	The Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged.
Failed	Unable to Process	C000 – CFFF	The Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in the Response will be logged.
Cancel	Matching terminated due to Cancel request	FE00	If the query was cancelled due to too many worklist items then the SCP has completed the matches. Worklist items are available for display or further processing. Otherwise, the Association is aborted using A-ABORT and the worklist query is marked as failed. The status meaning is logged and reported to the user if an interactive query.
Pending	Matches are continuing	FF00	The worklist item contained in the Identifier is collected for later display or further processing.
Pending	Matches are continuing – Warning that one or more Optional Keys were not supported	FF01	The worklist item contained in the Identifier is collected for later display or further processing. The status meaning is logged only once for each C-FIND operation.
*	*	Any other status code.	The Association is aborted using A-ABORT and the worklist is marked as failed. The status meaning is logged and reported to the user if an interactive query. Any additional error information in

			the Response will be logged.
--	--	--	------------------------------

The behavior of the MyLab during communication failure is summarized in the Table below.

**Table 29**  
**MODALITY WORKLIST COMMUNICATION FAILURE BEHAVIOR**

Exception	Behavior
Timeout	The Association is aborted using A-ABORT and the worklist query marked as failed. The reason is logged and reported to the user if an interactive query.
Association aborted by the SCP or network layers	The worklist query is marked as failed. The reason is logged and reported to the user if an interactive query.

Acquired images will always use the Study Instance UID specified for the Scheduled Procedure Step (if available). If an acquisition is unscheduled, a Study Instance UID will be generated locally.

The Table below provides a description of the MyLab Worklist Request Identifier and specifies the attributes that are copied into the images. Unexpected attributes returned in a C-FIND response are ignored.

Requested return attributes not supported by the SCP are set to have no value. Non-matching responses returned by the SCP due to unsupported optional matching keys are ignored. No attempt is made to filter out possible duplicate entries.

**Table 30**  
**WORKLIST REQUEST IDENTIFIER**

Module Name Attribute Name	Tag	VR	M	R	Q	D	IOD
SOP Common Specific Character Set	(0008,0005)	CS	S				
Scheduled Procedure Step Scheduled Procedure Step Sequence > Scheduled Station AE Title > Scheduled Procedure Step Start Date > Scheduled Procedure Step Start Time > Modality > Scheduled Performing Physician's Name > Scheduled Procedure Step Description > Scheduled Protocol Code Sequence > Scheduled Procedure Step ID	(0040,0100) (0040,0001) (0040,0002) (0040,0003) (0008,0060) (0040,0006) (0040,0007) (0040,0008) (0040,0009)	SQ AE DA TM CS PN LO SQ SH	S R x x S * x x x	x x x x x x x x x	x x x x x x d d d d d d w w w w w w	d w w w d x x x x x x x x

The above table should be read as follows:

Module Name: The name of the associated module for supported worklist attributes.

Attribute Name: Attributes supported to build a MyLab Worklist Request Identifier.

Tag: DICOM tag for this attribute.

VR: DICOM VR for this attribute.

M: Matching keys for (default) Worklist Update. A "S" will indicate that the MyLab will supply an attribute value for Single Value Matching, a "R" will indicate Range Matching and a "\*" will denote wildcard matching. The "Scheduled Station AE Title" is Matching Key with the Local AE Title when "This Unit" is selected. The "Modality" is set to "US", by default, but can be changed or blanked. Please note that "Specific Character Set" is set to "ISO\_IR 100" when the system is set to use a Latin keyboard, to "ISO\_IR 144" when it is set to use a Cyrillic keyboard, and it is not intended to be a matching key.

R: Return keys. An "x" will indicate that the MyLab will supply this attribute as Return Key with zero length for Universal Matching. The "Scheduled Station AE Title" is Return Key with zero length for Universal Matching when "All Units" is selected.

Q: Interactive Query Key. An "x" will indicate that the MyLab will supply this attribute as matching key, if entered in the QUERY PARAMETERS panel. For the "Patient's Name" and "Scheduled Performing Physician's Name" only Last Name and First Name can be inserted, a wildcard will be added for the other components. The "Scheduled Station AE Title" is single value matching key when "Specific Unit" is selected and a AE Title is supplied.

D: Displayed keys. A "w" indicates that this worklist attribute is displayed to the user in the WORKLIST QUERY panel. An "x" indicates that this worklist attribute is displayed to the user in the patient registration dialog, when the corresponding worklist item is selected pressing "SELECT EXAM" from the WORKLIST QUERY panel. For example, Patient Name will be displayed when registering the patient prior to an examination. A "d" indicates that this worklist attribute is displayed to the user only when selecting a worklist item and pressing "DETAILS".

IOD: An "x" indicates that this Worklist attribute is included into all Object Instances created during performance of the related Procedure Step.

The default Query Configuration is set to "Modality" (US) and "Date" (date of today). Optionally, additional matching are configurable in the QUERY PARAMETERS panel, as described above.

#### 4.2.4.3.2 Activity – Acquire Images

##### 4.2.4.3.2.1 Description and Sequencing of Activities <sup>24</sup>

Selecting an item from in the WORKLIST QUERY panel, and pressing “SELECT EXAM”, takes you back to the PATIENT DATA panel, already filled with all the data coming from the worklist. It is possible to modify or to input the Performing Physician, Height and Weight of the patient.

The trigger to create a MPPS SOP Instance is derived from pressing “OK” in the PATIENT DATA panel. An Association to the configured MPPS SCP system is established immediately and the related MPPS SOP Instance will be created.

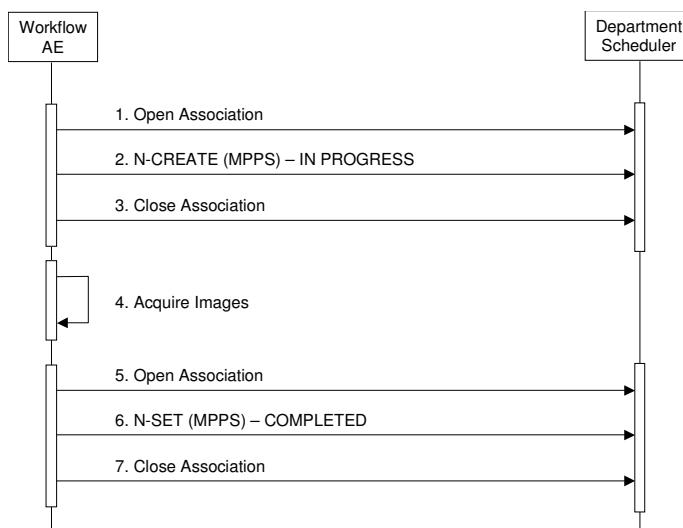

When closing the current exam (“Start End” key) the MPPS will be set to the final state “COMPLETED”. It is also possible to set it to “DISCONTINUED”, by checking “ABANDONED PROCEDURE” before pressing OK in the EXAM panel that appears when closing the exam. This check is pre-set when no images have been acquired, anyway can be unchecked if needed (for example, measures done without storing images). In case of automatic saving of the exam to a DICOM server, the MPPS message will be “COMPLETED” when one or more images have been acquired, “DISCONTINUED” otherwise.

Starting an exam for a locally registered Patient will create an “unscheduled cases”, by allowing MPPS Instances to be communicated for locally registered Patients.

The MyLab only supports a 0-to-1 relationship between Scheduled and Performed Procedure Steps.

The MyLab will initiate an Association to issue an:

- N-CREATE request according to the CREATE Modality Performed Procedure Step SOP Instance operation or a
- N-SET request to update the contents and state of the MPPS according to the SET Modality Performed Procedure Step Information operation.

**Figure 7  
SEQUENCING OF ACTIVITY – ACQUIRE IMAGES**

A possible sequence of interactions between the Workflow AE and a Departmental Scheduler (e.g. a device such as a RIS or HIS which supports the MPPS SOP Class as an SCP) is illustrated in Figure 7:

<sup>24</sup> MPPS SOP Class not present in VET models.

1. The Worklist AE opens an association with the Departmental Scheduler
2. The Worklist AE sends an N-CREATE request to the Departmental Scheduler to create an MPPS instance with status of “IN PROGRESS” and create all necessary attributes. The Departmental Scheduler acknowledges the MPPS creation with an N-CREATE response (status success).
3. The Worklist AE closes the association with the Departmental Scheduler.
4. All images are acquired and stored in the local database.
5. The Worklist AE opens an association with the Departmental Scheduler.
6. The Worklist AE sends an N-SET request to the Departmental Scheduler to update the MPPS instance with status of “COMPLETED” and set all necessary attributes. The Departmental Scheduler acknowledges the MPPS update with an N-SET response (status success).
7. The Worklist AE closes the association with the Departmental Scheduler.

#### 4.2.4.3.2.2 Proposed Presentation Contexts

The MyLab will propose Presentation Contexts as shown in the following table:

**Table 31  
PROPOSED PRESENTATION CONTEXTS FOR REAL-WORLD ACTIVITY ACQUIRE IMAGES**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name List	UID List		
Modality Performed Procedure Step <sup>25</sup>	1.2.840.10008.3.1.2.3.3	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None

#### 4.2.4.3.2.3 SOP Specific Conformance for MPPS <sup>26</sup>

The behavior of the MyLab when encountering status codes in an MPPS N-CREATE or N-SET response is summarized in Table 32. If any other SCP response status than "Success" or "Warning" is received by the MyLab, a message "MPPS update failed" will appear on the user interface.

**Table 32  
MPPS N-CREATE / N-SET RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully.
Failure	Processing Failure – Performed Procedure Step Object may no longer be updated	0110	The Association is aborted using A-ABORT and the MPPS is marked as failed. The status meaning is logged and reported to the user. Additional information in the Response will be logged (i.e. Error Comment and Error ID).
Warning	Attribute Value Out of Range	0116H	The MPPS operation is considered successful but the status meaning is logged. Additional information in the Response identifying the attributes out of range will be logged (i.e. Elements in the Modification List/Attribute List)
*	*	Any other	The Association is aborted using A-ABORT and the

<sup>25</sup> MPPS SOP Class not present in VET models.

<sup>26</sup> MPPS SOP Class not present in VET models.

		status code.	MPPS is marked as failed. The status meaning is logged and reported to the user.
--	--	--------------	--

The behavior of the MyLab during communication failure is summarized in the Table below:

**Table 33**  
**MPPS COMMUNICATION FAILURE BEHAVIOR**

Exception	Behavior
Timeout	The Association is aborted using A-ABORT and MPPS marked as failed. The reason is logged and reported to the user.
Association aborted by the SCP or network layers	The MPPS is marked as failed. The reason is logged and reported to the user.

Table 34 provides a description of the MPPS N-CREATE and N-SET request identifiers sent by the MyLab. Empty cells in the N-CREATE and N-SET columns indicate that the attribute is not sent. A “Zero length” attribute will be sent with zero length.

**Table 34**  
**MPPS N-CREATE / N-SET REQUEST IDENTIFIER**

Attribute Name	Tag	VR	N-CREATE	N-SET
Specific Character Set	(0008,0005)	CS	“ISO_IR 100” or “ISO_IR 144” <sup>27</sup> .	
Modality	(0008,0060)	CS	US	
Procedure Code Sequence	(0008,1032)	SQ	From Modality Worklist, contains the value of the Requested Procedure Code Sequence (0032,1064). Not present for unscheduled exams or if the User unchecks “PERFORM PROCEDURE AS REQUESTED” in the WORKLIST QUERY panel.	
Referenced Patient Sequence	(0008,1120)	SQ	Zero length.	
Patient’s Name	(0010,0010)	PN	From Modality Worklist (all 5 components) or user input. The user cannot modify values provided via Modality Worklist.	
Patient ID	(0010,0020)	LO	From Modality Worklist or user input. The user cannot modify values provided via Modality Worklist.	
Patient’s Birth Date	(0010,0030)	DA	From Modality Worklist or user input. The user cannot modify values provided via Modality Worklist.

#### 4.2.4.4 Association Acceptance Policy

The Workflow Application Entity does not accept Associations.

#### 4.2.5 Hardcopy Application Entity Specification

##### 4.2.5.1 SOP Classes

The MyLab provides Standard Conformance to the following SOP Classes:

**Table 35**  
**SOP CLASSES FOR AE HARDCOPY**

SOP Class Name	SOP Class UID	SCU	SCP
Basic Grayscale Print Management Meta	1.2.840.10008.5.1.1.9	Yes	No
Basic Color Print Management Meta	1.2.840.10008.5.1.1.18	Yes	No

##### 4.2.5.2 Association Policies

###### 4.2.5.2.1 General

The DICOM standard application context name for DICOM 3.0 is always proposed:

**Table 36**  
**DICOM APPLICATION CONTEXT FOR AE HARDCOPY**

Application Context Name	1.2.840.10008.3.1.1.1
--------------------------	-----------------------

###### 4.2.5.2.2 Number of Associations

It is possible to simultaneously configure many hardcopy devices, and for each one of them it is possible to configure many different printing profiles. According to the MyLab model, two or three of these printing profiles (belonging to the same or to different hardcopy devices) can be assigned to the print keys (one or more according to the model).

There are two different printing environments, one for the images belonging to the current Study (and displayed in the real-time environment, or selected and displayed from the "EXAM REV." environment), and another for the images belonging to older Studies (and displayed from the "ARCHIVE REV." environment).

Every time a print key is pressed, the current image is added to the current film according to the print key and the environment, so it is possible to simultaneously compose several films; whenever a film composing is completed, a print-job is prepared and the MyLab initiates the related Association.

**Table 37**  
**NUMBER OF ASSOCIATIONS INITIATED FOR AE HARDCOPY**

Maximum number of simultaneous Associations	Unlimited.
---	------------

MyLab does not accept Associations.

###### 4.2.5.2.3 Asynchronous Nature

The MyLab does not support asynchronous communication (multiple outstanding transactions over a single Association).

**Table 38**  
**ASYNCHRONOUS NATURE AS A SCU FOR AE HARDCOPY**

Maximum number of outstanding asynchronous transactions	1
---	---

###### 4.2.5.2.4 Implementation Identifying Information

The implementation information for this Application Entity can be found in Table 4.

#### 4.2.5.2.5 Printer configuration

The Service personnel, when configuring the MyLab for a given DICOM printer, must select a suitable printer configuration profile, according to the brand/model of the printer. In the printer configuration profile, compiled using the DICOM Conformance Statement of the printer, for every attribute that can be put in the N-CREATE of the Film Session SOP Class, in the N-CREATE of the Film Box SOP Class, and in the N-SET on the Image Box SOP Class, there is the complete list of accepted values, and the most suitable one (or a flag that says not to send this attribute, for the optional ones).

The Service personnel, according to the User's needs, must decide in which format(s) to print with that printer, preparing one or more printing profiles, in which some of the pre-defined attributes can be changed among the ones present in the pre-defined printer configuration profile, while for the others the most suitable one (or none) will be sent, according to the printer configuration profile. One of the configuration parameters is the color capability: for printers that accept both the Basic Grayscale and Basic Color Print Management Meta SOP Class, the Service personnel can decide in which way to print.

There is also a generic printer configuration profile, in which all the non-mandatory information (excepted the attributes directly managed from the User's interface) is marked not to be sent: this printer configuration profile can be used with unknown printers, leaving the printer software the burden to chose the most correct configuration parameters.

To use a configured printing profile, the User must tie it to one of the special print keys.

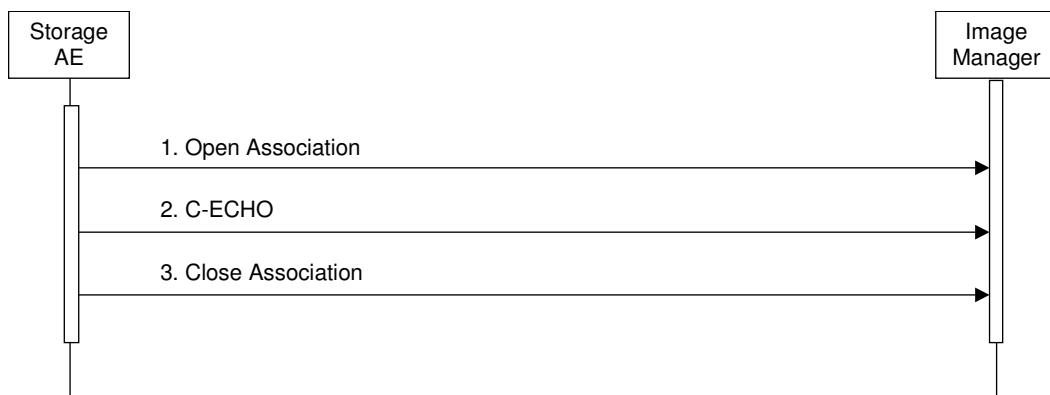

#### 4.2.5.3 Association Initiation Policy

##### 4.2.5.3.1.1 Activity – Connectivity Verification

##### 4.2.5.3.1.2 Description and Sequencing of Activities

The Hardcopy AE is invoked to perform a verification by the Print SCP configuration interface. The job consists of data describing the destination.

If a response to the C-ECHO-RQ is not received within a timeout, the Association will be aborted and an error will be reported to the User.

**Figure 8**  
**SEQUENCING OF ACTIVITY – CONNECTIVITY VERIFICATION**

##### 4.2.5.3.1.3 Proposed Presentation Context Table

The MyLab is capable of proposing the Presentation Contexts as shown in the following table:

**Table 39**  
**PROPOSED PRESENTATION CONTEXT FOR CONNECTIVITY VERIFICATION**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Negot
Name	UID	Name List	UID List		
Verification	1.2.840.10008.1.1	Implicit VR Little Endian	1.2.840.10008.1.2	SCU	None

#### 4.2.5.3.1.4 SOP Specific Conformance for Connectivity Verification

The MyLab provides standard conformance to the DICOM Verification Service Class as an SCU. The status code for the C-ECHO is as follows:

**Table 40**  
**C-ECHO RESPONSE STATUS HANDLING BEHAVIOUR**

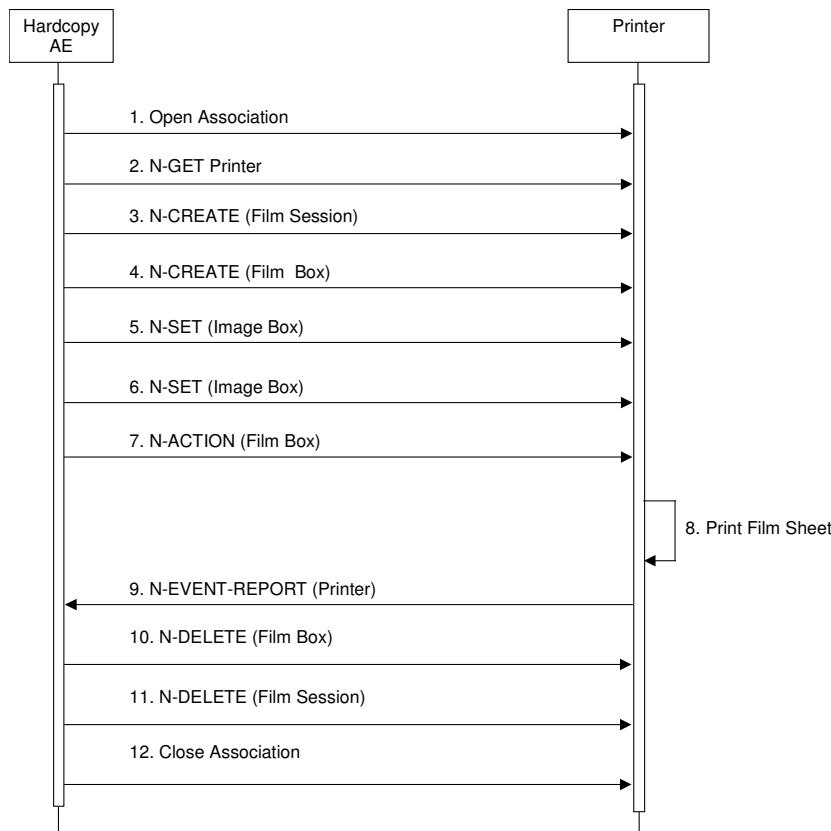

Code	Status	Meaning
0000	Success	The C-ECHO request is accepted.

#### 4.2.5.3.2 Activity – Film Images

##### 4.2.5.3.2.1 Description and Sequencing of Activities

A user composes images onto one film sheet by pressing the printing key for every image that can be added to the related printing layout; when the number of allowed images has been reached, or by selecting the "PRINT NOW TO DICOM PRINTER" entry in the pop-up menu related to the desired printing layout, the print-job is forwarded to the job queue and processed individually. Pressing the "RESET ADDED IMAGES" entry in the above pop-up menu will delete all the already added images from the current print-job.

The Hardcopy AE is invoked by the job control interface that is responsible for processing network tasks. The job consists of data describing the images and graphics to be printed as well as the requested layout and other parameters. The film sheet is sent image by image. If no association to the printer can be established, or some error occurs, the print-job is switched to a failed state and the user informed.

**Figure 9**  
**SEQUENCING OF ACTIVITY – FILM IMAGES**

A typical sequence of DIMSE messages sent over an association between Hardcopy AE and a Printer is illustrated in Figure 9:

1. Hardcopy AE opens an association with the Printer, using the Basic Grayscale or Basic Color Print Management META SOP Class according to the configuration of the printing layout.
2. N-GET on the Printer SOP Class is used to obtain current printer status information. If the Printer reports a status of FAILURE, the print-job is switched to a failed state and the user informed.
3. N-CREATE on the Film Session SOP Class creates a Film Session.
4. N-CREATE on the Film Box SOP Class creates a Film Box linked to the Film Session.
5. N-SET on the Image Box SOP Class transfers the contents of the first image to the printer.
6. N-SET on the Image Box SOP Class transfers the contents of the other various images to the printer, or delete the unwanted ones from the Film Box.
7. N-ACTION on the Film Box SOP Class instructs the printer to print the Film Box already composed.
8. The printer prints the requested number of film sheets
9. The Printer asynchronously reports its status via N-EVENT-REPORT notification (Printer SOP Class). The printer can send this message at any time. Hardcopy AE does not require the N-EVENT-REPORT to be sent. Hardcopy AE is capable of receiving an N-EVENT-REPORT notification at any time during an association. If the Printer reports a status of FAILURE, the print-job is switched to a failed state and the user informed.
10. N-DELETE on the Film Box SOP Class deletes the Film Box SOP instance.
11. N-DELETE on the Film Session SOP Class deletes the complete Film Session SOP instance.

12. Hardcopy AE closes the association with the Printer

Status of the print-job is reported through the job control interface. If any Response from the remote Application contains a status other than Success or Warning, the Association is aborted and the related Job is switched to a failed state.

#### 4.2.5.3.2.2 Proposed Presentation Contexts

The MyLab is capable of proposing the Presentation Contexts shown in the Table below:

**Table 41  
PROPOSED PRESENTATION CONTEXTS FOR ACTIVITY FILM IMAGES**

Presentation Context Table					
Abstract Syntax		Transfer Syntax		Role	Ext. Neg.
Name	UID	Name List	UID List		
Basic Grayscale Print Management Meta	1.2.840.10008.5.1.1.9	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None
Basic Color Print Management Meta	1.2.840.10008.5.1.1.18	Implicit VR LittleEndian	1.2.840.10008.1.2	SCU	None

#### 4.2.5.3.2.3 Common SOP Specific Conformance for all Print SOP Classes

The general behavior of Hardcopy AE during communication failure is summarized in the Table below. This behavior is common for all SOP Classes supported by Hardcopy AE.

**Table 42  
HARDCOPY COMMUNICATION FAILURE BEHAVIOR**

Exception	Behavior
Timeout	The Association is aborted. The reason is logged and reported to the user.
Association aborted by the SCP or network layers	The Association is aborted. The reason is logged and reported to the user.

#### 4.2.5.3.2.4 SOP Specific Conformance for the Printer SOP Class

Hardcopy AE supports the following DIMSE operations and notifications for the Printer SOP Class:

- N-GET
- N-EVENT-REPORT

Details of the supported attributes and status handling behavior are described in the following subsections.

#### 4.2.5.3.2.5 Printer SOP Class Operations (N-GET)

Hardcopy AE uses the Printer SOP Class N-GET operation to obtain information about the current printer status. The attributes obtained via N-GET are listed in the Table below:

**Table 43  
PRINTER SOP CLASS N-GET REQUEST ATTRIBUTES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Printer Status	(2110,0010)	CS	Provided by Printer	ALWAYS	Printer

Printer Status Info	(2110,0020)	CS	Provided by Printer	ALWAYS	Printer
Printer Name	(2110,0030)	LO	Provided by Printer (for logging purposes)	ALWAYS	Printer
Manufacturer	(0008,0070)	LO	Provided by Printer (for logging purposes)	ALWAYS	Printer
Manufacturer's Model Name	(0008,1090)	LO	Provided by Printer (for logging purposes)	ALWAYS	Printer
Software Version(s)	(0018,1020)	LO	Provided by Printer (for logging purposes)	ALWAYS	Printer

The Printer Status information is evaluated as follows:

1. If Printer status (2110,0010) is NORMAL, the print-job continues to be printed.
2. If Printer status (2110,0010) is FAILURE, the print-job is marked as failed. The contents of Printer Status Info (2110,0020) is logged and reported to the user.
3. If Printer status (2110,0010) is WARNING, the print-job continues to be printed. The contents of Printer Status Info (2110,0020) is logged.

The behavior of Hardcopy AE when encountering status codes in a N-GET response is summarized in the Table below:

**Table 44  
PRINTER SOP CLASS N-GET RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The request to get printer status information was success.
*	*	Any other status code.	The Association is aborted. The status meaning is logged and reported to the user.

#### 4.2.5.3.2.6 Printer SOP Class Notifications (N-EVENT-REPORT)

Hardcopy AE is capable of receiving an N-EVENT-REPORT request at any time during an association.

The behavior of Hardcopy AE when receiving Event Types within the N-EVENT-REPORT is summarized in the Table below:

**Table 45  
PRINTER SOP CLASS N-EVENT-REPORT BEHAVIOUR**

Event Type Name	Event Type ID	Behavior
Normal	1	The print-job continues to be printed.
Warning	2	The print-job continues to be printed. The contents of Printer Status Info (2110,0020) is logged.
Failure	3	The print-job is marked as failed. The contents of Printer Status Info (2110,0020) is logged and reported to the user.
*	*	An invalid Event Type ID will cause a status code of 0113H to be returned in a N-EVENT-REPORT response.

The reasons for returning specific status codes in a N-EVENT-REPORT response are summarized in the Table below:

**Table 46**  
**PRINTER SOP CLASS N-EVENT-REPORT RESPONSE STATUS REASONS**

Service Status	Further Meaning	Error Code	Reasons
Success	Success	0000	The notification event has been successfully received.
Failure	No Such Event Type	0113H	An invalid Event Type ID was supplied in the N-EVENT-REPORT request.
Failure	Processing Failure	0110H	An internal error occurred during processing of the N-EVENT-REPORT. A short description of the error will be returned in Error Comment (0000,0902).

#### 4.2.5.3.2.7 SOP Specific Conformance for the Film Session SOP Class

Hardcopy AE supports the following DIMSE operations for the Film Session SOP Class:

- N-CREATE
- N-DELETE

Details of the supported attributes and status handling behavior are described in the following subsections.

#### 4.2.5.3.2.8 Film Session SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the Table below:

**Table 47**  
**FILM SESSION SOP CLASS N-CREATE REQUEST ATTRIBUTES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Number of Copies	(2000,0010)	IS	Chosen by the User among the values in the Printer Profile.	ALWAYS	USER
Print Priority	(2000,0020)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Medium Type	(2000,0030)	CS	Chosen by the User among the values in the Printer Profile.	ANAP	USER
Film Destination	(2000,0040)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Film Session Label	(2000,0050)	LO	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Memory Allocation	(2000,0060)	IS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Owner ID	(2100,0160)	SH	Pre-defined value from the Printer Profile.	ANAP	PROFILE

The behavior of Hardcopy AE when encountering status codes in a N-CREATE response is summarized in the Table below:

**Table 48**  
**FILM SESSION SOP CLASS N-CREATE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully.
Warning	Attribute Value Out of Range	0116H	The N-CREATE operation is considered successful and the user is notified that there was a warning. The status meaning and additional information in the Response identifying the attributes out of range will be logged (i.e. Elements in the Modification List/Attribute List).
Warning	Attribute List Error	0107H	The N-CREATE operation is considered successful and the user is notified that there was a warning. The status meaning and additional information in the Response identifying the attributes will be logged (i.e. Elements in the Attribute Identifier List).
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed and the user is notified that there was an error. The status meaning is logged.

#### 4.2.5.3.2.9 Film Session SOP Class Operations (N-DELETE)

The behavior of Hardcopy AE when encountering status codes in a N-DELETE response is summarized in the Table below:

**Table 49**  
**FILM SESSION SOP CLASS N-DELETE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully.
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed and the user is notified that there was an error. The status meaning is logged.

#### 4.2.5.3.2.10 SOP Specific Conformance for the Film Box SOP Class

Hardcopy AE supports the following DIMSE operations for the Film Box SOP Class:

- N-CREATE
- N-ACTION
- N-DELETE

Details of the supported attributes and status handling behavior are described in the following subsections.

#### 4.2.5.3.2.11 Film Box SOP Class Operations (N-CREATE)

The attributes supplied in an N-CREATE Request are listed in the Table below:

**Table 50**  
**FILM BOX SOP CLASS N-CREATE REQUEST ATTRIBUTES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Image Display Format	(2010,0010)	CS	Chosen by the User among the <i>STANDARD</i> <i>c,r</i> values in the Printer Profile.	ALWAYS	USER
Film Orientation	(2010,0040)	CS	Chosen by the User among the values in the Printer Profile.	ANAP	USER

Film Size ID	(2010,0050)	CS	Chosen by the User among the values in the Printer Profile.	ANAP	USER
Magnification Type	(2010,0060)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Smoothing Type	(2010,0080)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Border Density	(2010,0100)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Empty Image Density	(2010,0110)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Max Density	(2010,0130)	US	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Min Density	(2010,0120)	US	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Trim	(2010,0140)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Configuration Information	(2010,0150)	ST	Pre-defined value from the Printer Profile.	ANAP	PROFILE
Referenced Film Session Sequence	(2010,0500)	SQ		ALWAYS	AUTO
>Referenced SOP Class UID	(0008,1150)	UI	1.2.840.10008.5.1.1.1	ALWAYS	AUTO
>Referenced SOP Instance UID	(0008,1155)	UI	From created Film Session SOP Instance	ALWAYS	AUTO
Requested Resolution ID	(2020,0050)	CS	Pre-defined value from the Printer Profile.	ANAP	PROFILE

The behavior of Hardcopy AE when encountering status codes in a N-CREATE response is summarized in the Table below:

**Table 51**  
**FILM BOX SOP CLASS N-CREATE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully.
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed. The status meaning is logged and reported to the user.

#### 4.2.5.3.2.12 Film Box SOP Class Operations (N-ACTION)

An N-ACTION Request is issued to instruct the Print SCP to print the contents of the Film Box. The Action Reply argument in an N-ACTION response is not evaluated.

The behavior of Hardcopy AE when encountering status codes in a N-ACTION response is summarized in the Table below:

**Table 52**  
**FILM BOX SOP CLASS N-ACTION RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully. The film has been accepted for printing.
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed. The status meaning is logged and reported to the user.

#### 4.2.5.3.2.13 Film Box SOP Class Operations (N-DELETE)

The behavior of Hardcopy AE when encountering status codes in a N-DELETE response is summarized in the Table below:

**Table 53  
FILM BOX SOP CLASS N-DELETE RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully.
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed and the user is notified that there was an error. The status meaning is logged.

#### 4.2.5.3.2.14 SOP Specific Conformance for the Image Box SOP Class

Hardcopy AE supports the following DIMSE operations for the Image Box SOP Class:

- N-SET

Details of the supported attributes and status handling behavior are described in the following subsections.

#### 4.2.5.3.2.15 Image Box SOP Class Operations (N-SET)

The attributes supplied in an N-SET Request are listed in the Tables below, one for the Basic Grayscale Image Box SOP Class, and one for the Basic Color Image Box SOP Class:

**Table 54  
BASIC GRAYSCALE IMAGE BOX SOP CLASS N-SET REQUEST ATTRIBUTES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Image Position	(2020,0010)	US	According to the place in the Film Box	ALWAYS	AUTO
Basic Grayscale Image Sequence	(2020,0110)	SQ		ALWAYS	AUTO
>Samples Per Pixel	(0028,0002)	US	1	ALWAYS	AUTO
>Photometric Interpretation	(0028,0004)	CS	MONOCHROME2	ALWAYS	AUTO
>Rows	(0028,0010)	US	According to the dimension of the preformatted image (the same for all the images in the same film)	ALWAYS	AUTO
>Columns	(0028,0011)	US	According to the dimension of the preformatted image (the same for all the images in the same film)	ALWAYS	AUTO
>Bits Allocated	(0028,0100)	US	8	ALWAYS	AUTO
>Bits Stored	(0028,0101)	US	8	ALWAYS	AUTO
>High Bit	(0028,0102)	US	7	ALWAYS	AUTO
>Pixel Representation	(0028,0103)	US	0000H = unsigned integer.	ALWAYS	AUTO
>Pixel Data	(7FE0,0010)	OB	Pixels of rendered image	ALWAYS	AUTO

**Table 55**  
**BASIC COLOR IMAGE BOX SOP CLASS N-SET REQUEST ATTRIBUTES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Image Position	(2020,0010)	US	According to the place in the Film Box	ALWAYS	AUTO
Basic Color Image Sequence	(2020,0111)	SQ		ALWAYS	AUTO
>Samples Per Pixel	(0028,0002)	US	3	ALWAYS	AUTO
>Photometric Interpretation	(0028,0004)	CS	RGB	ALWAYS	AUTO
>Rows	(0028,0010)	US	According to the dimension of the preformatted image (the same for all the images in the same film)	ALWAYS	AUTO
>Columns	(0028,0011)	US	According to the dimension of the preformatted image (the same for all the images in the same film)	ALWAYS	AUTO
>Bits Allocated	(0028,0100)	US	8	ALWAYS	AUTO
>Bits Stored	(0028,0101)	US	8	ALWAYS	AUTO
>High Bit	(0028,0102)	US	7	ALWAYS	AUTO
>Pixel Representation	(0028,0103)	US	0000H = unsigned integer.	ALWAYS	AUTO
>Pixel Data	(7FE0,0010)	OB	Pixels of rendered image	ALWAYS	AUTO

The behavior of Hardcopy AE when encountering status codes in a N-SET response is summarized in the Table below:

**Table 56**  
**IMAGE BOX SOP CLASS N-SET RESPONSE STATUS HANDLING BEHAVIOR**

Service Status	Further Meaning	Error Code	Behavior
Success	Success	0000	The SCP has completed the operation successfully. Image successfully stored in Image Box.
*	*	Any other status code.	The Association is aborted and the print-job is marked as failed. The status meaning is logged and reported to the user.

#### 4.2.5.4 Association Acceptance Policy

The Hardcopy Application Entity does not accept Associations.

## 4.3 NETWORK INTERFACES

### 4.3.1 Physical Network Interface

The MyLab supports a single network interface. One or both of the following physical network interfaces will be available depending on installed hardware options:

**Table 57  
SUPPORTED PHYSICAL NETWORK INTERFACES**

Ethernet 100baseT
Ethernet 10baseT

### 4.3.2 Additional Protocols

The MyLab conforms to the System Management Profiles listed in the Table below. All requested transactions for the listed profiles and actors are supported. Support for optional transactions are listed in the Table below:

**Table 58  
SUPPORTED SYSTEM MANAGEMENT PROFILES**

Profile Name	Actor	Protocols Used	Optional Transactions	Security Support
Network Address Management	DHCP Client	DHCP	N/A	
	DNS Client	DNS	N/A	

#### 4.3.2.1 DHCP

DHCP can be used to obtain TCP/IP network configuration information. The default Windows DHCP client is used, if enabled by the System Administrator: please refer to the Windows documentation for further details.

#### 4.3.2.2 DNS

DNS can be used for address resolution. If DHCP is not in use or the DHCP server does not return any DNS server addresses, the identity of the DNS servers can be configured by the System Administrator. If a DNS server is not in use, the numeric IP addresses need to be used.

## 4.4 CONFIGURATION

### 4.4.1 AE Title/Presentation Address Mapping

#### 4.4.1.1 Local AE Titles and TCP Ports

All local applications use the AE Title, IP address, and listening TCP Port. The Default AE Title is "MYLAB", the default TCP Port is 6104 or 11112 according to the model, both can be changed from the DICOM configuration menu, the new values become effective after a reboot of the system.

#### 4.4.1.2 Remote AE Title/Presentation Address Mapping

The AE Titles, host names or IP addresses, and TCP port numbers of remote applications can be configured from the DICOM configuration menu.

#### 4.4.1.2.1 Storage Application Entity

The MyLab User must set the AE Title, port-number, host-name for remote Storage SCPs, enabling one or more of them.

The MyLab User must set the AE Title, port-number, host-name for remote Storage Commitment SCPs, enabling only one of them at a given time <sup>28</sup>.

<sup>28</sup> Storage Commitment SOP Class not present in VET models.

#### 4.4.1.2.2 Workflow Application Entity

The MyLab User must set the AE Title, port-number, host-name for remote MWL SCPs, enabling only one of them at a given time.

The MyLab User must set the AE Title, port-number, host-name for remote MPPS SCPs, enabling only one of them at a given time <sup>29</sup>.

#### 4.4.1.2.3 Hardcopy Application Entity

The MyLab User must set the AE Title, port-number, host-name and printer profile for remote Print SCPs, enabling one or more of them. For every configured printer, one or more printing profile can be created, and tied to one of the printing keys.

### 4.4.2 Parameters

A large number of parameters related to acquisition and general operation can be configured using the Service/Installation Tool. The Table below only shows those configuration parameters relevant to DICOM communication. See the MyLab Service Manual for details on general configuration capabilities.

**Table 59  
CONFIGURATION PARAMETERS TABLE**

Parameter	Configurable (Yes/No)	Default Value
<b>General Parameters</b>		
Max PDU Receive Size	No	28672 Bytes
Max PDU Send Size (larger PDUs will never be sent, even if the receiver supports a larger Max PDU Receive Size. If the receiver supports a smaller Max PDU Receive Size then the Max PDU Send Size will be reduced accordingly for the duration of the Association. Max PDU Receive Size information is exchanged during DICOM Association Negotiation in the Maximum Length Sub-Item of the A-ASSOCIATION-RQ and A-ASSOCIATE-AC)	No	28672 Bytes
Time-out waiting for a acceptance or rejection response to an Association Request (Application Level Timeout)	No	60 s
Time-out waiting for a response to an Association release request (Application Level Timeout)	No	60 s
Time-out waiting for completion of a TCP/IP connect request (Low-level timeout)	No	60 s
Time-out awaiting a Response to a DIMSE Request (Low-Level Timeout)	Yes	60 s
Time-out for waiting for data between TCP/IP-packets (Low Level Timeout)	No	60 s
<b>Storage SCU Parameters</b>		
Storage SCU time-out waiting for a response to a C-STORE-RQ	Yes	60 s
Number of times a failed send job may be retried	No	0 (Failed send jobs are not retried)
Delay between retrying failed send jobs	No	Not applicable
Maximum number of simultaneously initiated Associations by the Storage-SCU AE	No	1
Supported Transfer Syntaxes (separately configurable for each remote)	No	See Table 11,

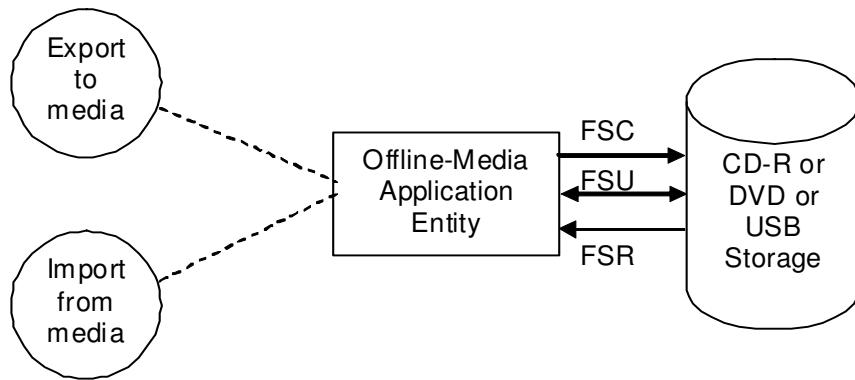

<sup>29</sup> MPPS SOP Class not present in VET models.

Parameter	Configurable (Yes/No)	Default Value
AE)		not separately configurable
<b>Storage Commitment Parameters</b>		
Timeout waiting for a Storage Commitment Notification (maximum duration of applicability for a Storage Commitment Transaction UID).	Yes	600 s
Maximum number of simultaneously accepted Associations by the Storage AE.	No	1
Delay association release after sending a Storage Commitment Request (wait for a Storage Commitment Notification over the same association).	No	0 s
<b>Modality Worklist Parameters</b>		
Modality Worklist SCU time-out waiting for the final response to a C-FIND-RQ	Yes	60 s
Maximum number of Worklist Items	No	Unlimited
Supported Transfer Syntaxes for Modality Worklist	No	See Table 27.
Delay between automatic Worklist Updates	No	No automatic retry
Query Worklist for specific Scheduled Station AE Title	Yes	Local AE Title
Query Worklist for specific Modality Value	No	US
<b>MPPS Parameters</b>		
MPPS SCU time-out waiting for a response to a N-CREATE-RQ	No	60 s
MPPS SCU time-out waiting for a response to a N-SET-RQ	No	60 s
Supported Transfer Syntaxes for MPPS	No	See Table 31.
<b>Print Parameters</b>		
Print SCU time-out waiting for a response to a N-CREATE-RQ	Yes	60 s
Print SCU time-out waiting for a response to a N-SET-RQ	Yes	60 s
Print SCU time-out waiting for a response to a N-ACTION-RQ	Yes	60 s
Supported Transfer Syntaxes (separately configurable for each remote printer)	No	See Table 41, not separately configurable
Number of times a failed print-job may be retried	No	0 (Failed send jobs are not retried)
Delay between retrying failed print-jobs	No	Not applicable
Printer correction LUT (separately configurable for each remote printer)	No	Not applied

## 5 MEDIA INTERCHANGE

### 5.1 IMPLEMENTATION MODEL

#### 5.1.1 Application Data Flow

**Figure 10  
APPLICATION DATA FLOW DIAGRAM FOR MEDIA STORAGE**

- Offline-Media Application Entity exports images, clips, Secondary Capture and SR objects<sup>30</sup> to a CD-R or a DVD or a USB Storage medium. It is associated with the local real-world activity “Archive”. “Archive” (to CD-R or to DVD or to USB) is performed upon user request for each study when closing it, or for specific studies selected from the had disk database. Offline-Media Application Entity import images, clips and Secondary Capture objects from a CD-R or a DVD or a USB Storage medium. It is associated with the local real-world activity “Import DICOM DB”.

#### 5.1.2 Functional Definition of AEs

##### 5.1.2.1 Functional Definition of Offline-Media Application Entity

It is possible to activate the Offline-Media Application Entity entry for exporting both when closing the current study, and from the database panel.

When closing the current study, a panel will allow the User to decide if and where to archive in DICOM the images, clips and SR objects: the User should check “DICOM” and select among “CD/DVD” (the CD-R or DVD), “USB”, “<DICOM SERVER 1>”, “<DICOM SERVER 2>”, etc. Selecting “CD/DVD” or “USB” will store the DICOM objects on the chosen medium, while selecting one of the configured DICOM servers (“<DICOM SERVER 1>”, “<DICOM SERVER 2>”, etc.) will send them in DICOM format to the selected destination.

Please note that the current study will not be archived into the local database unless you also check “LOCAL ARCHIVE”.

From the local database panel, pressing the “DICOM” soft-key, a “DICOM PROCEDURE” panel will appear, allowing to choose between the following destinations: “CD/DVD” (the CD-R or DVD), “USB”, “<DICOM SERVER 1>”, “<DICOM SERVER 2>”, etc. In this way you can store or send the selected studies (previously archived to the local database), in DICOM format, to the selected destination.

When activating the above described functions choosing “CD/DVD” or “USB”, the SOP Instances associated with the selected study (or studies) will be collected into one export job. The existence of an export job queue entry will activate the Offline-Media AE.

<sup>30</sup> DICOM Structured Report not available in VET models.

If the required medium is not present, or cannot be accessed, the related export job will be set to an error state and it will be possible to restart it later by the user via job control interface. The Offline-Media AE will not try to export again the instances automatically.

It is possible to activate the Offline-Media Application Entity entry for importing when the ARCHIVE environment is open. A softkey "IMPORT DICOM DB" appears, pressing it a list of available devices appears, selecting either USB or CD/DVD a list of the available studies is shown, you can select one or more to retrieve them into the local database.

### 5.1.3 Sequencing of Real-World Activities

For exporting, the operator can insert a new CD-R or DVD, or a USB storage media (according to the case), at any time before the Offline-Media Application Entity activation. The CD-R or DVD will be formatted, while the USB storage media must be previously formatted using another computer. For CD-R and DVD a viewer will be automatically put into the media.

Please note that the USB storage media, to meet the DICOM standard, must be formatted selecting the FAT16 or FAT32 File System, while NTFS is not allowed. For example, these are options of the standard Windows Operating System formatting utility.

For importing, the operator can insert a CD-R or DVD, or a USB storage media (according to the case) at any time before the Offline-Media Application Entity activation.

### 5.1.4 File Meta Information Options

See section 3.6 for the implementation information written to the File Meta Header in each file.

## 5.2 AE SPECIFICATIONS

### 5.2.1 Offline-Media Application Entity Specification

The Offline-Media Application Entity provides standard conformance to the Media Storage Service Class. The Application Profiles and roles are listed below:

**Table 60  
APPLICATION PROFILES, ACTIVITIES AND ROLES FOR OFFLINE-MEDIA**

Application Profiles Supported	Real World Activity	Role
STD-GEN-CD	Import/Export from/to CD-R	FRS, FSC
STD-GEN-DVD-JPEG	Import/Export from/to DVD	FRS, FSC
STD-GEN-USB-JPEG	Import/Export from/to USB	FRS, FSC, FSU
STD-US-SC-MF-CDR	Import/Export from/to CD-R	FRS, FSC
STD-US-SC-MF-DVD	Import/Export from/to DVD	FRS, FSC

#### 5.2.1.1 File Meta Information for the Application Entity

The Source Application Entity Title included in the File Meta Header is configurable (see section 5.4).

#### 5.2.1.2 Real-World Activities

##### 5.2.1.2.1 Activity – Export to CD-R or DVD or USB

The Offline-Media Application Entity acts as an FSC when requested to export SOP Instances from the local database to a CD-R or DVD or USB medium. When exporting to USB the Offline-Media Application Entity can act as an FSU if a DICOMDIR is already present.

##### 5.2.1.2.2 Activity – Import from CD-R or DVD or USB

The Offline-Media Application Entity acts as an FSR when requested to import SOP Instances from a CD-R or DVD or USB medium to the local database.

##### 5.2.1.2.3 Media Storage Application Profiles

The Offline-Media Application Entity supports the STD-GEN-CD, STD-GEN-DVD-JPEG, STD-GEN-USB-JPEG, STD-US-SC-MF-CDR, and the STD-US-SC-MF-DVD Application Profiles.

Please note that, to strictly follow the STD-GEN-CD application profile, the images must be exported in the uncompressed format, by selecting the appropriate configuration in the QUALITY tab of the DICOM CONFIGURATION panel (IMAGE QUALITY HIGH, CLIP QUALITY UNCOMPRESSED, otherwise the patients must not contain any US-MF objects).

Please note that, to strictly follow the STD-GEN-DVD-JPEG and the STD-GEN-USB-JPEG application profiles, the single frame US or SC images must be exported in the uncompressed or JPEG lossy compressed format, by selecting the appropriate configuration in the QUALITY tab of the DICOM CONFIGURATION panel (IMAGE QUALITY LOW or IMAGE QUALITY HIGH).

Please note that, to strictly follow the STD-US-SC-MF-CDR and STD-US-SC-MF-DVD application profiles, the SC image or SR object export must be disabled, by selecting the appropriate configuration in the REPORT EXPORT tab of the DICOM CONFIGURATION panel (NONE).

The Offline-Media Application Entity supports the SOP Classes and Transfer Syntaxes listed in the Table below:

**Table 61  
IODS, SOP CLASSES AND TRANSFER SYNTAXES FOR OFFLINE MEDIA**

Information Object Definition	SOP Class UID	Transfer Syntax	Transfer Syntax UID
Media Storage Directory Storage	1.2.840.10008.1.3.10	Explicit VR LittleEndian	1.2.840.10008.1.2.1
Ultrasound Image Storage	1.2.840.10008.5.1.4.1.1.6.1	Explicit VR LittleEndian	1.2.840.10008.1.2.1
		RLE Lossless	1.2.840.10008.1.2.5
		JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50
Ultrasound Multiframe Image Storage	1.2.840.10008.5.1.4.1.1.3.1	Explicit VR LittleEndian	1.2.840.10008.1.2.1
		JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50
Secondary Capture Image Storage	1.2.840.10008.5.1.4.1.1.7	Explicit VR LittleEndian	1.2.840.10008.1.2.1
		RLE Lossless	1.2.840.10008.1.2.5
		JPEG lossy Baseline (Process 1)	1.2.840.10008.1.2.4.50
Comprehensive SR Storage <sup>31</sup>	1.2.840.10008.5.1.4.1.1.88.33	Explicit VR LittleEndian	1.2.840.10008.1.2.1

The Transfer Syntax used for Ultrasound and Secondary Capture Images can be changed from the User's Interface pressing the MENU button, selecting DICOM CONFIGURATION and entering the QUALITY tab of the configuration panel. The following choices are allowed for IMAGE QUALITY:

1. HIGH (UNCOMPRESSED): the Explicit VR LittleEndian Transfer Syntax will be used;
2. MEDIUM (LOSSLESS RLE): the RLE Transfer Syntax will be used;
3. LOW (LOSSY JPEG): the JPEG lossy Baseline (Process 1) Transfer Syntax will be used.

The Transfer Syntax used for Ultrasound Multiframe Images can be changed, for each different media destination (USB, CD/DVD, Network folder), from the User's Interface pressing the MENU button, selecting DICOM CONFIGURATION and entering the QUALITY tab of the configuration panel. You will find four different settings for CLIP QUALITY; selecting LOW, MEDIUM and HIGH the JPEG lossy Baseline (Process 1) will be used, with three different compression levels, while selecting UNCOMPRESSED the Explicit VR

<sup>31</sup> Not present in VET models. Not available for importing.

Little Endian will be used. It is also possible to reduce the frame matrix of the exported clips: for MATRIX SIZE a slider allows to select SMALL, MEDIUM and FULL.

Please note that archiving Ultrasound Multiframe Images without compressing them could produce very large files: this option should not be used for normal operations, especially with long clips.

The US Image, US Multiframe Image, Secondary Capture Image and Comprehensive SR Storage SOP Classes are extended to create Standard Extended SOP Classes by addition of standard and private attributes to the created SOP Instances as documented in Section 8.1.

Also the Media Storage Directory Storage SOP Class is extended, for supporting a larger number of attributes. The DICOMDIR file created includes the Basic Directory IOD containing Directory Records at the Patient and the subsidiary Study, Series and Image levels, appropriate to the SOP Classes in the corresponding File Set. All Type 1 and Type 2 attributes are included in the DICOMDIR. A few other attributes (Type 3 for the Basic Directory IOD), when present in the indexed objects, are also included in the DICOMDIR at the correct level.

## 5.2 AUGMENTED AND PRIVATE APPLICATION PROFILES

MyLab does not support any augmented for private application profiles.

## 5.3 MEDIA CONFIGURATION

All local applications use the AE Title configured by the Service personnel. The Application Entity Title configurable for Media Services is the same used for the network storage.

## 6 SUPPORT OF CHARACTER SETS

All MyLab DICOM applications support the

ISO\_IR 100 (ISO 8859-1:1987 Latin Alphabet No. 1 supplementary set).

The MyLab models which can be configured to use a Cyrillic keyboard, when the Cyrillic keyboard is enabled will support instead

ISO\_IR 144 (ISO 8859-5:1999 Latin/Cyrillic Alphabet supplementary set).

In any case, the exams will be exported with the Specific Character Set that was in use in the system that acquired them at the moment they were acquired.

## 7 SECURITY

DICOM security is not implemented on the MyLab. It is assumed that MyLab is used within a secured environment. It is assumed that a secured environment includes at a minimum:

- a. Firewall or router protections to ensure that only approved external hosts have network access to MyLab.
- b. Firewall or router protections to ensure that MyLab only has network access to approved external hosts and services.
- c. Any communication with external hosts and services outside the locally secured environment use appropriate secure network channels (e.g. such as a Virtual Private Network (VPN))

Other network security procedures such as automated intrusion detection may be appropriate in some environments. Additional security features may be established by the local security policy and are beyond the scope of this conformance statement.

## 8 ANNEXES

### 8.1 IOD CONTENTS

#### 8.1.1 Created SOP Instances

Table 62 specifies the attributes of an US, US-MF or Secondary Capture Image transmitted by the MyLab storage application. Table 63 specifies the attributes of a Structured Report object transmitted by the MyLab storage application.

The following tables use a number of abbreviations. The abbreviations used in the “Presence of ...” column are:

VNAP	Value Not Always Present (attribute sent zero length if no value is present)
ANAP	Attribute Not Always Present
ALWAYS	Always Present
EMPTY	Attribute is sent without a value

The abbreviations used in the “Source” column:

USER	the attribute value source is from User input
MWL	the attribute value source is from DICOM Modality Worklist Service
AUTO	the attribute value is generated automatically
CONFIG	the attribute value source is a configurable parameter

NOTE: All dates and times are encoded in the local configured calendar and time. Date, Time and Time zone are configured using the Service/Installation Tool.

#### 8.1.1.1 US, US Multiframe and Secondary Capture Image IOD

**Table 62  
IOD OF US, US-MF AND SC CREATED SOP INSTANCES**

IE	Module	Reference	Presence of Module
Patient	Patient	Table 64	ALWAYS

### 8.1.1.3 Description of the produced modules

**Table 64**  
**PATIENT MODULE OF CREATED SOP INSTANCES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Patient's Name	(0010,0010)	PN	From Modality Worklist or user input (in this case it accepts only the first three components). For VET systems, the first two of the five components in their order of occurrence are the Owner's name and the name of the animal. The remaining components are not present.	VNAP	MWL / USER
Patient ID	(0010,0020)	LO	From Modality Worklist or user input <sup>33</sup> .	VNAP	MWL / USER
Patient's Birth Date	(0010,0030)	DA	From Modality Worklist or user input.	VNAP	MWL / USER
Patient's Sex	(0010,0040)	CS	From Modality Worklist or user input.	VNAP	MWL / USER

<sup>32</sup> Present since build F065XXX.

<sup>33</sup> When the worklist is not enabled and the user did not fill the Patient ID, the machine will generate a DICOM Patient ID (a progressive number for each exam produced by the same machine), just to avoid exporting studies with an empty Patient ID.

Patient Species Description (*)	(0010,2201)	LO	CANINE, FELINE, EQUINE, BOVINE, OVINE, CAPRINE, PORCINE or UNKNOWN.	VNAP (*)	USER
Patient Breed Description (*)	(0010,2292)	LO	From User input.	VNAP (*)	USER
Patient Breed Code Sequence (*)	(0010,2293)	SQ	Always empty.	EMPTY (*)	AUTO
Breed Registration Sequence (*)	(0010,2294)	SQ	Always empty.	EMPTY (*)	AUTO
Responsible Person (*)	(0010,2297)	PN	From User input, the Owner's Name.	VNAP (*)	USER
Responsible Person Role (*)	(0010,2298)	CS	Present if Responsible Person is not empty, in this case it is Always OWNER.	ANAP (*)	AUTO
Responsible Organization (*)	(0010,2299)	LO	Always empty.	EMPTY (*)	AUTO

**Table 65**  
**GENERAL STUDY MODULE OF CREATED SOP INSTANCES**

Attribute Name	Tag	VR	Value	Presence of Value	Source
Study Instance UID	(0020,000D)	UI	From Modality Worklist or generated by the device.	ALWAYS	MWL / AUTO
Study Date	(0008,0020)	DA	<yyymmdd>	ALWAYS	AUTO
Study Time	(0008,0030)	TM	<hhmmss>	ALWAYS	AUTO
Accession Number	(0008,0050)	SH	From Modality Worklist or user input.	VNAP	MWL / USER
Referring Physician's Name	(0008,0090)	PN	From Modality Worklist or user input.	VNAP	MWL / USER
Study ID	(0020,0010)	SH	Generated by the device. From Requested Procedure ID (0040,1001) when Modality Worklist is enabled.	ALWAYS	AUTO / MWL
Study Description	(0008,1030)	LO	Automatically filled by device according to the selected application (localized); can be manually modified.	ALWAYS	AUTO / USER
Referenced Study Sequence	(0008,1110)	SQ	From Modality Worklist, is the reference to the Study SOP Class/SOP Instance. Not present for unscheduled exams.	VNAP	MWL
Procedure Code Sequence	(0008,1032)	SQ	From Modality Worklist, contains the value of the Requested Procedure Code Sequence (0032,1064). Not present for unscheduled exams or if the User unchecks "PERFORM PROCEDURE AS REQUESTED" in the WORKLIST QUERY panel.	VNAP	MWL

(\*) Present only in SOP instances produced by a VET system.

### 8.1.2 Used Fields in received IOD by application

The MyLab storage application does not receive SOP Instances.

<sup>44</sup> Present only for CnTI clips since build F065XXX..

## 8.2 STRUCTURED REPORT MAPPING <sup>45</sup>

The mappings of the DICOM SR objects produced by the MyLab system are organized in a manner similar to the DICOM SR Templates as described in PS 3.16 of the DICOM Standard. This appendix has the aim of finding, for a given measure in the MyLab system, its corresponding encoding in the produced SR object.

### 8.2.1 Adult Echocardiography SR mapping

The following table follows the same organization of the reports that can be printed from the MyLab system itself, or exported as a series of Secondary Capture images. That is, the tables are divided into various sections that correspond to the various sections of the reports; each section is divided in subsections that correspond to the various subsections of the reports; the first column of the table correspond to the measure name in the Esaote report. The other three columns contain the DICOM mapping of this measure, indicating the Base Measurement Concept Name, the Section, and the Concept or Acquisition Context Modifiers.

### 8.2.2 Vascular SR mapping

The following table follows the same organization of the reports that can be printed from the MyLab system itself, or exported as a series of Secondary Capture images. That is, the tables are divided into various sections that correspond to the various sections of the reports; each section is divided in subsections that correspond to the various subsections of the reports; the first column of the table correspond to the measure name in the Esaote report. The other three columns contain the DICOM mapping of this measure, indicating the Base Measurement Concept Name, the Section, and the Concept or Acquisition Context Modifiers.

### 8.2.3 OB-GYN SR mapping

The following tables follow the same organization of the reports that can be printed from the MyLab system itself, or exported as a series of Secondary Capture images. That is, the tables are divided into various sections that correspond to the various sections of the reports; each section is divided in subsections that correspond to the various subsections of the reports; the first column of the table correspond to the measure name in the Esaote report. The other two or three columns contain the DICOM mapping of this measure, indicating the Base Measurement Concept Name, the Section (when applicable), and the Concept or Acquisition Context Modifiers.

Some of the obstetric measures (gestational age and growth) are calculated from other measures, according to a given equation or table, that can be chosen in the configuration of the MyLab. The following table shows the relationship between the selected equation or table and its encoding in the OB-GYN SR objects.

**Table 88**  
**OB-GYN SR MAPPING – EQUATIONS / TABLES**

## 8.3 ECHO-CARDIO AND VASCULAR CUSTOM FINDINGS SECTION

### 8.3.1 Description

For Echo-Cardio and Vascular reports the user can include in the exported structured report the defined custom measurements, calculations and evaluations, grouped in macromeasurements. In order to export this custom information, also keeping the intended grouping, but without the need to define a local dictionary of codes, we introduced a generic structure that does not assign specific codes, but uses the labels given by the user. Please note that presently only one Custom Findings Section (or none) will be present; for future extensions more than one can be used.

**Figure 11**  
**CUSTOM FINDINGS SECTION DIAGRAM**

### 8.3.2 Template definition

This section contains the definition of the private templates used, according to the conventions adopted by DICOM standard (see DICOM standard document PS 3.16).

#### 8.3.2.1 Topmost template extensions

Both topmost templates (TID 5200 and TID 5100) are of Type: Extensible. We extend them according to the following tables.

**Table 89**  
**TID 5200 – ECHOCARDIOGRAPHY PROCEDURE REPORT EXTENSION**

NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	EV (125200, DCM, "Adult Echocardiography Procedure Report")	1	M		Root node
	.....	.....	.....				....
25 >	CONTAINS	INCLUDE	DTID (9900) Custom Findings Section	1-n <sup>58</sup>	U		

<sup>58</sup> Presently only one Custom Findings Section (or none) will be present; for future extensions more than one can be used.

**Table 90**  
**TID 5100 – VASCULAR ULTRASOUND REPORT EXTENSION**

	NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1			CONTAINER	EV (125100, DCM, "Vascular Ultrasound Procedure Report")	1	M		
	.....	.....	.....				.....	
31 >	CONTAINS	INCLUDE	DTID (9900) Custom Findings Section	1-n <sup>59</sup>	U			

### 8.3.2.2 TID 9900 Custom Findings Section

For both TID 5200 and TID 5100 we add a Custom Findings Section (TID 9900) that contains the various Custom Macromeasurement sections (TID 9901).

Type: Extensible  
Order: Significant

**Table 91**  
**TID 9900 – CUSTOM FINDINGS SECTION**

	NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1			CONTAINER	DT (CUSTOMFIND, 99ESA_C1, "Custom Findings")	1	M		
2 >	CONTAINS	INCLUDE	DTID (9901) , Custom Macromeasurement	1-n	M			

### 8.3.2.3 TID 9901 Custom Macromeasurement

Each Custom Macromeasurement section (TID 9901) contains the custom macromeasurement label, the Image Mode (for Echo-cardio reports only), and the Custom Sections (TID 9902) for the various measurements, calculations and evaluations included in that custom macromeasurement.

Type: Extensible  
Order: Significant

**Table 92**  
**TID 9901 – CUSTOM MACROMEASUREMENT**

	NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1			CONTAINER	DT (MACROMEAS, 99ESA_C1, "Custom Macromeasurement")	1	M		
2 >	HAS CONCEPT MOD	TEXT	DT (MACROLABEL, 99ESA_C1, "Macromeasurement Label")	1	M			Free text
3 >	HAS CONCEPT MOD	CODE	EV (G-0373, SRT, "Image Mode") <sup>60</sup>	1	U			BCID (12224) Ultrasound Image Modes
4 >	CONTAINS	INCLUDE	DTID (9902) , Custom Measurement	1-n	M			

<sup>59</sup> Presently only one Custom Findings Section (or none) will be present; for future extensions more than one can be used.

<sup>60</sup> Although this template is used both for Echo-cardio (TID5200) and Vascular (TID5100) Structured Report, the field "Image Mode" is only used for Echo-cardio (TID5200).

### 8.3.2.4 TID 9902 Custom Measurement

Each Custom Measurement section (TID 9902) contains the custom label as given by the user, and the measurement, calculation or evaluation corresponding to that label.

Type: Extensible  
Order: Significant

**Table 93**  
**TID 9902 – CUSTOM MEASUREMENT**

	NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	EV (MEAS, 99ESA_C1, "Custom Measurement")	1	M			
2	>	HAS CONCEPT MOD	TEXT	DT (MEASLABEL, 99ESA_C1, "Measurement Label")	1	M		Free text
3	>	CONTAINS	INCLUDE	DTID (300) Measurement	1	MC	XOR row 4,5	\$Measurement = EV (MEAS_VALUE, 99ESA_C1, "Measurement Value")
4	>	CONTAINS	INCLUDE	DTID (300) Measurement	1	MC	XOR row 3,5	\$Measurement = EV (CALC_VALUE, 99ESA_C1, "Calculation Value")
5	>	CONTAINS	INCLUDE	DTID (9903) , Custom Text	1	MC	XOR row 3,4	\$TextName = EV (EVAL_VALUE, 99ESA_C1, "Evaluation Value")

### 8.3.2.5 TID 9903 Custom Text

Each Custom Text section (TID 9903) contains the free text given by the user.

Type: Extensible  
Order: Significant

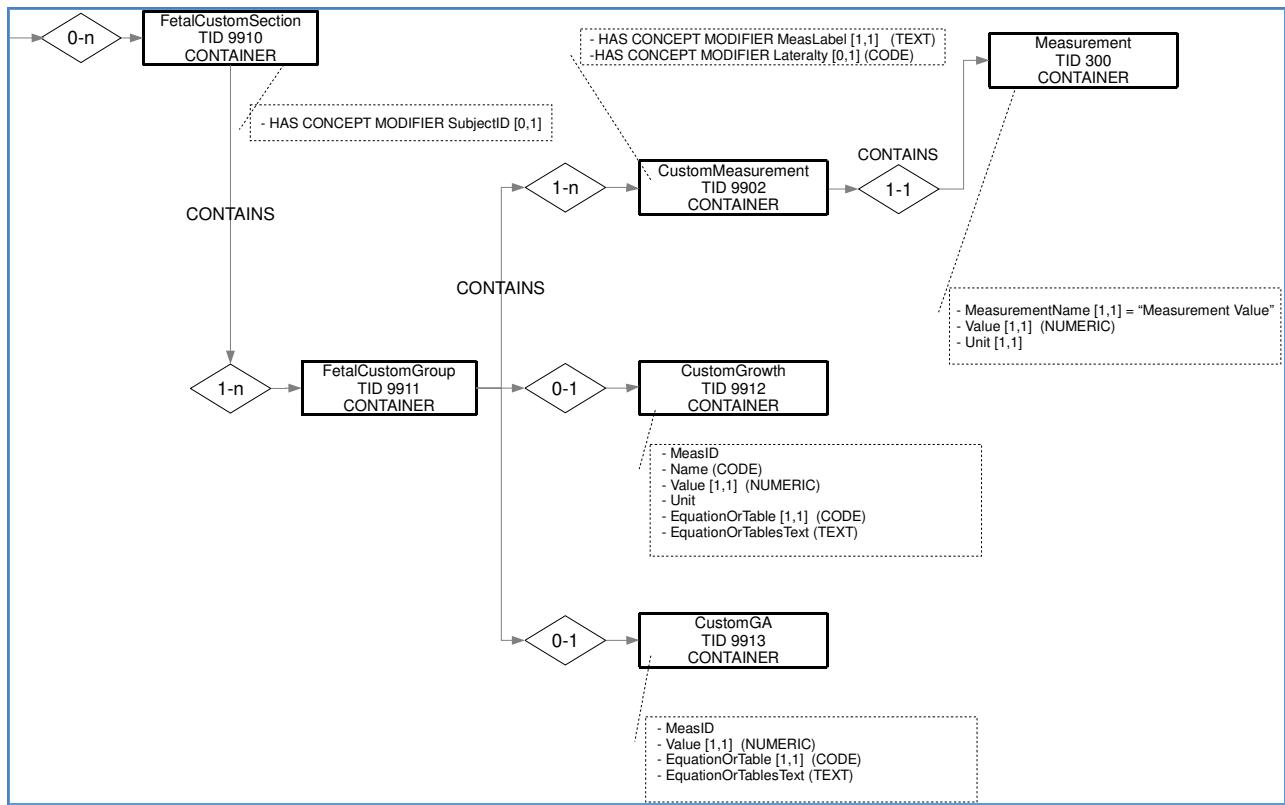

**Table 94**  
**TID 9903 – CUSTOM TEXT**

	NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1			TEXT	\$TextName	1	M		

## 8.4 FETAL CUSTOM SECTION AND TABLES

### 8.4.1 Description

The user can define fetal custom measurements, and Growth and GA estimations based on custom tables. In order to export this custom information, without the need to define a local dictionary of codes, we introduced a generic structure that does not assign specific codes, but uses the labels given by the user. See Figure 12 for an overall of the Fetal Custom Section, but refer to the tables below for a complete description, as some of the details present in the figure are not implemented.

**Figure 12**  
**FETAL CUSTOM SECTION**

### 8.4.2 Template definition

This section contains the definition of the private templates used, according to the conventions adopted by DICOM standard (see DICOM standard document PS 3.16).

#### 8.4.2.1 Topmost template extensions

Topmost template TID 5000 is of Type: Extensible. We extend it according to the following table.

**Table 95**  
**TID 5000 – OB-GYN ULTRASOUND PROCEDURE REPORT EXTENSION**

NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	EV (125000, DCM, "OB-GYN Ultrasound Procedure Report")	1	M		Root node
	.....	.....	.....				....
25 >	CONTAINS	INCLUDE	DTID (9910) Fetal Custom Section	1-n	U		

#### 8.4.2.2 TID 9910 Fetal Custom Section

For TID 5000 we add one or more Fetal Custom Section (TID 9910) that contains the various Fetal Custom Groups (TID 9911).

Type: Extensible  
Order: Significant

**Table 96**  
**TID 9910 – FETAL CUSTOM SECTION**

NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	DT (CN-100, 99ESA_C1, "Fetal Custom Section")	1	M		
2	HAS CONCEPT MOD	CODE	EV (121030, DCM, "SubjectID")	1	U		Free text
3	>	CONTAINS	INCLUDE DTID (9911), FetalCustomGroup	1-n	M		

#### 8.4.2.3 TID 9911 Fetal Custom Group

Each Fetal Custom Custom Group (TID 9911) contains one or more Custom Measurement, and possibly a Custom Growth / Custom Gestational Age estimation.

Type: Extensible  
Order: Significant

**Table 97**  
**TID 9911 – FETAL CUSTOM GROUP**

NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	DT (CN-101, 99ESA_C1, "Fetal Custom Group")	1	M		
2	>	CONTAINS	INCLUDE DTID (9902), Custom Measurement	1-n	M		
3	>	CONTAINS	INCLUDE DTID (9912), CustomGrowth	0-1	U		
4	>	CONTAINS	INCLUDE DTID (9913), CustomGA	0-1	U		

#### 8.4.2.4 TID 9902 Custom Measurement

Each Custom Measurement section (TID 9902) contains the custom label as given by the user, and the measurement, calculation or evaluation corresponding to that label.

Type: Extensible  
Order: Significant

**Table 98**  
**TID 9902 – CUSTOM MEASUREMENT**

NL	Rel with Parent	VT	Concept Name	VM	Req Type	Condition	Value Set Constraint
1		CONTAINER	EV (MEAS, 99ESA_C1, "Custom Measurement")	1	M		
2	>	HAS CONCEPT MOD	TEXT DT (MEASLABEL, 99ESA_C1, "Measurement Label")	1	M		Free text
3	>	CONTAINS	INCLUDE DTID (300) Measurement	1	MC	XOR row 4,5	\$Measurement = EV (MEAS_VALUE, 99ESA_C1, "Measurement Value")

#### 8.4.2.5 TID 9912 Custom Growth

Each Fetal Custom Group (TID 9911) can contains the Custom Growth percentile rank, and the reference to the table of values used to estimate it.

Type: Extensible  
 Order: Significant

**Table 99**

2	>	INFERRRED FROM	DT (121424,DCM,"Table of Values)	0-1	O		

#### 8.4.3 Fetal biometry group extension to include Custom Growth and GA

The user can define Growth and GA estimations based on custom tables, not only for custom measurements, but also for standard measurements. In order to export this custom information, we extend the Fetal Biometry Group (TID 5008) inserting TID 9912 CustomGA and TID 9913 CustomGrowth defined above, as described in the table below (see text in boldface).

**Table 101**  
**TID 5508 – FETAL BIOMETRY GROUP EXTENSION**

## 8.5 DATA DICTIONARY OF PRIVATE ATTRIBUTES

The Private Attributes added to created SOP Instances are listed in the Table below. The MyLab system reserves blocks of private attributes in groups 2FF1 and 6161. Further details on usage of these private attributes are contained in Section 8.1.

**Table 102  
DATA DICTIONARY OF PRIVATE ATTRIBUTES<sup>61</sup>**

Tag	Attribute Name	VR	VM
(2FF1,0060)	Private Creator	LO	1
(2FF1,6001)	Private Creator Data Version	LO	1
(2FF1,6031)	Contrast master gain	DS	1
(2FF1,6032)	Anti-log law vector	IS	256

(6161,1131)	List of the custom measures, in Esaote proprietary XML format <sup>62</sup>	OB	1

## 8.6 CODED TERMINOLOGY AND TEMPLATES

The Workflow AE is capable of supporting arbitrary coding schemes for Procedure and Protocol Codes: the value of the Code Meaning will be displayed. The contents of Requested Procedure Code Sequence (0032,1064) and Scheduled Protocol Code Sequence (0040,0008) supplied in Worklist Items will be mapped to Image IOD and MPPS attributes as described in Table 30 and Table 34.

The contents of the Performed Protocol Code Sequence (0040,0260) for cardiac US-MF images acquired in a Staged protocol (when available) are automatically filled with the codes listed in the following table, subset of Context ID 12001, Ultrasound Protocol Types.

**Table 103  
CODES USED FOR PERFORMED PROTOCOL CODE SEQ. FOR STAGED PROTOCOL**

ESAOTE terminology	Code Value (0008,0100)	Coding Scheme designator (0008,0102)	Code Meaning (0008,0104)
BICYCLE ERGOMETER	P2-31102	SRT	Stress test using Bicycle Ergometer
DIPYRIDAMOLE	P2-3110A	SRT	Dipyridamole Stress protocol

<sup>61</sup> Present only when “ADD MEASUREMENTS FILE” has been set.

<sup>62</sup> Only present for exams acquired with sw release 5.xx and later.

ESAOTE terminology	Code Value (0008,0100)	Coding Scheme designator (0008,0102)	Code Meaning (0008,0104)
DOBUTAMINE	P2-31108	SRT	Dobutamine Stress protocol

The contents of the Stage Code Sequence (0040,000A) for cardiac US-MF images acquired in a Staged protocol (when available) are automatically filled with the codes listed in the following table, subset of Context ID 12002 Ultrasound Protocol Stage Types. For Stage Name (0008,2120) a corresponding defined term is adopted.

**Table 104  
CODES USED FOR STAGE CODE SEQ. FOR STAGED PROTOCOL**

ESAOTE terminology	Code Value (0008,0100)	Coding Scheme designator (0008,0102)	Code Meaning (0008,0104)	Stage Name (0008,2120)	
				Protocol Type	
				Dipyridamole or Dobutamine	Bicycle
BASELINE STATE	F-01604	SRT	Resting state	BASELINE	PRE-EXERCISE
STRESS STATE	F-05019	SRT	Cardiac stress state	LOW DOSE	PEAK-EXERCISE
PEAK STRESS STATE	F-05028	SRT	Peak cardiac stress state	PEAK DOSE	PEAK-EXERCISE
CARDIAC RECOVERY STATE	F-05018	SRT	Cardiac stress recovery state	RECOVERY	POST-EXERCISE

The contents of the View Code Sequence (0054,0220) for cardiac US-MF images acquired in a Staged protocol (when available) are automatically filled with the codes listed in the following table, subset of Context ID 12226 Echocardiography Image View. For View Name (0008,2127) a corresponding defined term is adopted.

**Table 105  
CODES USED FOR VIEW CODE SEQ. FOR STAGED PROTOCOL**

ESAOTE terminology	Code Value (0008,0100)	Coding Scheme designator (0008,0102)	Code Meaning (0008,0104)	View Name (0008,2127)
LAX	G-0396	SRT	Parasternal long axis	LAX
SAX PM	G-039B	SRT	Parasternal short axis at the Papillary Muscle level	SAX_PM
A4C	G-A19C	SRT	Apical four chamber	A4C
A2C	G-A19B	SRT	Apical two chamber	A2C
SAX MV	G-039A	SRT	Parasternal short axis at the Mitral Valve level	SAX_MV
SAX AP	G-0398	SRT	Parasternal short axis at the aortic valve level	SAX_AP
ALAX	G-0395	SRT	Apical long axis	ALAX

Structured Reporting uses codes supplied by DCMR (DICOM Code Mapping Resource, PS 3-16), LOINC, SRT and, for Vascular and OB-GYN SR, ESAOTE\_P1 (Esaote Private Codes for Ultrasound), 99ESA\_P1 (Esaote Private Codes for Ultrasound, alternate set) and 99ESA\_C1 (Esaote Private Codes for Custom Ultrasound measurements) . See Table 106 for the list of the available ESAOTE\_P1, 99ESA\_P1 and

99ESA\_C1 codes (please note that not all the items of this table are actually used in the produced SR documents).

## 8.7 STANDARD EXTENDED / SPECIALIZED / PRIVATE SOP CLASSES

No Specialized or Private SOP Classes are supported.

### 8.7.1 US, US Multiframe and Secondary Capture Image Storage SOP Classes

The US, US Multiframe and Secondary Capture Image Storage, and Comprehensive SR Storage SOP Classes are extended to create Standard Extended SOP Classes by addition of standard and private attributes to the created SOP Instances as documented in Section 8.1.

## 8.8 PRIVATE TRANSFER SYNTAXES

No Private Transfer Syntaxes are supported.
