

## O-scan Equine eXP

To clearly distinguish between lesions in the bone, ligaments or tendons of foot, pastern, fetlock, and carpus, the O-scan ensures accurate imaging through excellent contrast resolution and image quality: essential for an optimal diagnosis. O-scan Equine is the perfect imaging solution for your daily clinical use: outstanding image quality and operating simplicity. Thanks to the new eXP platform you can rely on unsurpassable performance, comparable only to the image quality of 1.5T systems.

**Ideal for...**
