PREPARATION

1. Clean the probe with a validated product. (***)

DISINFECTION

2. Dispense two aliquots of Tristel Duo onto a dry wipe (Duo Wipe is recommended).

3. Use the wipe to spread the foam over the surface of the probe to cover all areas. (**)

Leave the surface to dry to ensure a minimum 30 sec contact time.

5. Rinse the probe thoroughly with deionized water or use Tristel Rinse Wipe to remove excess foam.

DRYING

6. Carefully dry the probe with a sterile soft, dry cloth or gauze.
