NEVER STOP SEEING THE UNSEEN.
WE HAVE A UNIVERSE TO EXPLORE.
Human beings are ambitious creatures, who made research their purpose. In ancient times, they used to observe the universe and its silent movements, wondering about their destiny.

Then, that universe became a destination to explore. And Esaote reached it as well, transforming this tireless research into a corporate philosophy: to see what others didn’t see and to be pioneers of discovery. Without stopping.

But there is a universe much closer to us, equally multi-faceted and with many things to dig into: the human body. Just like space, some body parts are not visible to the naked eye: that’s why we need Esaote’s advanced technology to be able to explore them and unlock their secrets.

This technology is constantly improved to support medical science, contributing to a better future for everyone and finally making what is essential visible to the eye.
The Esaote Group is a leader in the biomedical equipment sector, in particular in the areas of ultrasound, dedicated MRI, and software for managing the diagnostic process. Headquartered in Genoa, Italy, the Group has its production and research units in Italy (Genoa and Florence) as well as in the Netherlands (Maastricht and Sittard) and it is active in around 100 countries worldwide. The Esaote Group employs over 1,250 people, 20% of whom are engaged in Research and Development, a sector in which the company invested approximately 12% of its total turnover in 2022. Esaote, which proudly collaborates with clinical and scientific research centers and universities around the world, has received numerous accolades for its performance in terms of innovation, its investments in research, human capital and technology, as well as for extraordinary product design.

Magnetic Resonance
Changing the MRI Perspective

A large MRI product portfolio including Dedicated and Whole Body systems based on permanent magnet technology and characterized by great image quality, low operating costs and optimal ergonomics for patient comfort.
DEDICATED TO COMFORT

- S-scan

DEDICATED TO ADVANCED DIAGNOSTICS

- G-scan Brio

MAGNIFY YOUR POSSIBILITIES

- Magnifico Open

- Wide range of clinical applications
- Superb image quality
- Advanced features
Our Healthcare IT solutions are designed to improve sensitivity in diagnosis. AI is used to help professionals increase their confidence, by facilitating decision-making and favouring dialogue.
