30 August – 3 September

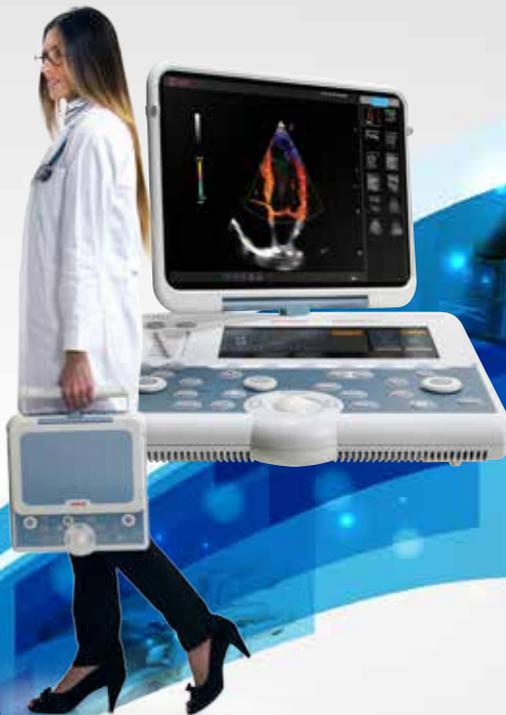

New Ultrasound Systems, delivering affordable Productivity, Efficiency, Value

MyLabTMGamma **NEW**

A World without Boundaries

with Smart Portable Ultrasound

MyLabTMGamma is equipped with comprehensive cardiac and vascular packages and provides excellent image quality in a very compact size.

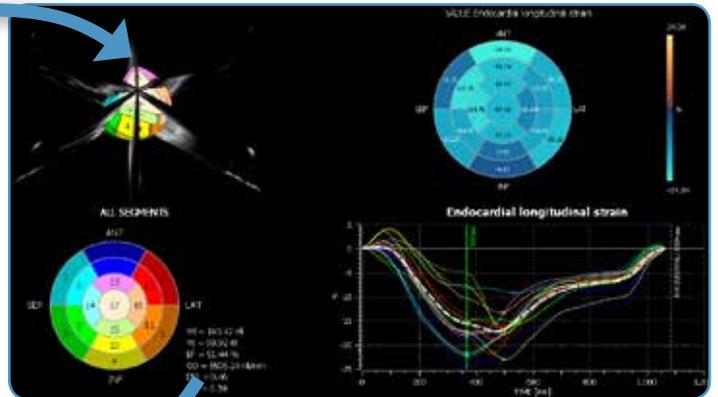

MyLabTMSix **NEW**

The Premium Choice for affordable shared services

MyLabTMSix delivers an extraordinary cardiovascular ultrasound package, starting from fundamental 2D-M mode imaging (with TEI and XView Technologies) to top performing CFM, PW and CW Doppler, that properly manage any kind of required examination.

XStrain™ 4D

Get the Whole Picture

XStrain™ is a non-invasive tool to better investigate myocardial function and explore and quantify aspects of the heart's physiology which were not possible to detect and quantify with previous ultrasound technologies.

Advantages of using the XStrain-4D:

- Volumetric LV assessment based on high frame rate imaging acquired with standard cardiac probe
- Global results display and visualisation by coronary territories
- Result shown in the patient's report

Committed to Education

24 June 2014 - 1 June 2015

My EchocardiLab - online course

Please subscribe at: www.myechocardiolab.com

8 - 10 October 2014

Myocardial Deformation Imaging: from Tissue Doppler to Speckle Tracking

Please subscribe at: <http://didattica.dctv.unipd.it/spektrak.php>

At the Esaote booth (F250)

31 August - 2 September

09.40 hrs & 14.50 hrs (daily)

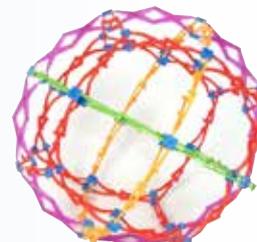

Fundamentals of Strain

Kim Blinch, Clinical Application Manager, Esaote

*Quantities limited

Esaote offers a full integrated echocardiography lab!

Healthcare IT

The most comprehensive CVIS PACS Software Platform for all cardiology specialties

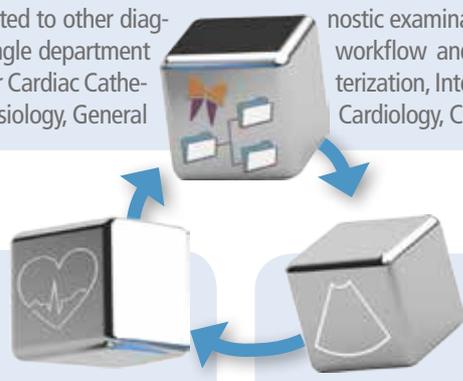

Cath-Lab
Echocardiography
Electrophysiology
Electrocardiography

Endovascular Interventions

By encompassing all cardiology specialties into one single platform, SUITESTENSA allows for achieving a better workflow from patient admission to exam execution, reporting, administration and distribution. SUITESTENSA cardiology folder contains all exams performed in the cardiology department and can be connected to other diagnostic examinations to get the entire clinical history of a patient simply as just one click. Dedicated both to single department workflow and to enterprise-wide healthcare networks, SUITESTENSA CVIS manages diagnostic imaging for Cardiac Catheterization, Interventional Cardiology, Endovascular Surgery, Echocardiography, Electrocardiography, Electrophysiology, General Cardiology, Cardiovascular Surgery.

ECG

MyCardioPad™

- First ECG system with a total touch-screen interface
- Automatically acquire, print, save, transfer and retrieve diagnostic ECG's to and from SEMA or HIS
- Instant- on and ECG print-out is less than 3 seconds

MyLab™Seven

Ultrasound Systems

- Productivity & simplicity in real-time
- High performance in echocardiography
- Compact design and Stand-by mode for easy mobility and quick start-up
- State-of-the art technology & connectivity
