

**ESAOTE SHOWCASES VIRTUAL NAVIGATOR & FUSION IMAGING Solution
AND TWO NEW ULTRASOUND SYSTEMS, MYLAB™SIX & MYLAB™GAMMA,
AT RSNA 2014**

19th November 2014 [Genoa, Italy] - At RSNA 2014 (Radiological Society of North America) ESAOTE will showcase **Virtual Navigator fusion imaging**. ESAOTE recently received U.S. Food and Drug Administration (FDA) clearance to market and sell its Virtual Navigator fusion imaging technology for ultrasound to U.S. customers in addition to other worldwide countries.

Virtual Navigator provides the ability to fuse real-time ultrasound images with magnetic resonance imaging (MR), computed tomography (CT), positron emission tomography (PET) and 3D ultrasound. Particularly useful for liver and other abdominal interventions, Virtual Navigator can also be used for urologic, musculoskeletal, peripheral vascular, and transcranial radiologic exams.

Also at RSNA 2014 two new ultrasound systems will be showcased, solidifying ESAOTE's position as the leading innovator in the global ultrasound market, delivering affordable productivity, efficiency and value. **MyLab™Six** and **MyLab™Gamma** have been developed to address key segments of the imaging market, strengthening ESAOTE's global ultrasound portfolio - from application-specific to fully shared services solutions.

As a leader in ergonomics and design simplicity, Esaote has engineered the MyLab™Gamma and MyLab™Six to meet the strenuous demands of the sonographer's working environment. High on vision, low on noise, these 'green' ultrasound systems with remote service capabilities improve user comfort without compromising diagnostic confidence.

"These versatile, valuable and efficient new products are the work of considerable research into the current and future demands of the market place," said Carlos Alonso, CEO, Esaote.

MyLab™Six

MyLab™Six is a complete cart-based system that can be used across a broad range of applications from general imaging to women's health and cardiovascular. It comes with advanced scanning features, software and probes.

"MyLab™Six represents the extra steps we are taking to add value and efficiency to ultrasound in any specific clinical setting," explains Giovanni Altobelli, Ultrasound Marketing Product Manager at Esaote. *"It offers a premium system, yet affordable, to customers requesting user comfort, performance and versatility. The optimized and automated workflow are key to maximising patient throughput without compromising diagnostic confidence."*

MyLab™Gamma

MyLab™Gamma, Esaote's latest portable laptop sized ultrasound, provides fast boot up and resume from-standby which means the system is ready to use within seconds. Integration of wireless connectivity and one-click networking sets MyLab™Gamma apart from traditional portable ultrasound.

"MyLab™Gamma finally sets ultrasound free," explains Joop Geijssen, Ultrasound Project Manager at Esaote. *"We now bring superb image quality and fast clinical decision making right at the point of care."*

Incorporating high resolution with a range of probes makes MyLab™Gamma an optimal ultrasound solution for Cardiovascular and other General Imaging applications.

Additional Dedicated MRI and Healthcare IT advances unveiled at RSNA

The new eXP Technology upgrade for Esaote's Dedicated MRI systems enables faster examinations and increased diagnostic confidence. **eXP Technology** will be showcased at the Esaote booth on the **O-scan** and **G-scan Brio**, where clinical image presentations will be conducted to demonstrate enhanced image quality.

SUITESTENSA RIS PACS advanced information system for the management of all Radiology Department activities will also be unveiled at RSNA. Suitestensa now includes second-generation Structured Report functionalities and 3D applications for additional opportunities and reduced workflow. Mobile PACs enables off-site access to images.

EXPERIENCE THE ESAOTE WORLD AT RSNA 2014: **Booth N. 2536**, Hall A, South Building, Level 3.

About Esaote

With €276.1 million consolidated sales in 2013 (of which 65% were generated from international markets), Esaote Group is a leading player in the biomedical equipment sector, with a particular focus on ultrasound, dedicated magnetic resonance, and software for managing the diagnostic process. Esaote has over 1,335 employees, 19% of which are employed in R&D activities. Esaote has industrial and research units in Italy (Genoa, Florence, Naples), the Netherlands (Maastricht) and China (Shenzhen). Esaote is internationally recognized as one of the "**Top Ten**" diagnostic imaging companies in the world and enjoys the co-operation of worldwide scientific and clinical research centers and universities. Esaote has filed more than 120 international patents.
