

PRESS RELEASE

West Suffolk Hospital purchases Esaote system for Rheumatology

West Suffolk Hospital have purchased a new Esaote MyLab™Seven for their busy Rheumatology Department . Dr Shweta Bhagat is pictured along with Dr David O'Reilly taking delivery of the new scanner.

Dr Bhagat commented: “I am very pleased with our choice of the Esaote MyLab™Seven scanner. The picture quality is excellent and the features are very user friendly. It is easy to transport from one clinic to another: this represents a key factor for us. It is an excellent tool for enhancing the diagnostic and therapeutic services in my rheumatology clinic.”

The MyLab™Seven is an ideal system for Rheumatology due to the extremely sensitive Power Doppler function and its wide range of available transducers up to 22MHz.

Dr Bhagat also took the opportunity to enrol on the Esaote International Schools course in Rheumatology ran by the world renowned Professor Walter Grassi. As part of its commitment to education , Esaote runs an international training program with courses hosted by world leading professionals. All clinicians who use an Esaote scanner are welcome to attend any of the International school courses.
